ISSUE A8/13

## Alustore Modular Storage System

Juralco Aluminium Building Products Ltd designs and distributes specialist aluminium joinery systems through a national network of franchised fabricators and agents.

For more than 25 years we have been at the forefront of specialist aluminium door and window products suitable for New Zealand joinery and building methods. Our comprehensive product range includes security and insect screens, balustrades and gates, shutters and awnings, shower screens, wardrobe doors and organisers and internal doors.

The Alustore Modular Storage System combines anodised aluminium components and Melteca or glass shelving to produce a wide range of modern storage configurations for the living room or wardrobe. Each unit is manufactured and installed with either wall or ceiling mounted uprights. The shelves are custom-made in length within a choice of three shelf depths and positioned to suit individual requirements. Drawer units come in standard sizes either fixed to the uprights or on rolling casters

This Guide is intended for use by Architects and Specifiers  
Pages 2-8 cover areas of general interest. Pages 9 onwards contain more detail
