Cavity Sliders™

Full-Height Track

Full-HeightTrack

The CS Full Height Track allows the ceiling lining to be fixed flush with the underside of the track, ensuring a seamless continuation of the ceiling line where the door slides. Ideal for large room dividers or for overheight doors, the track can be painted on-site to match the ceiling colour, blending perfectly with your interior design.

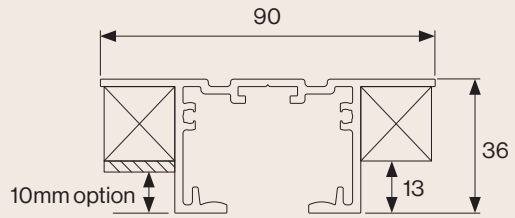
The CS SmartMount system streamlines traditional installation processes while making it easy to achieve a seamless, minimal clearance look.

Features

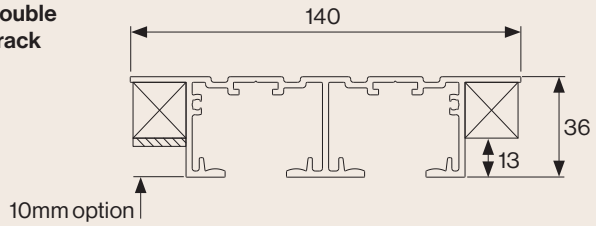
- Track is high quality, heavy duty extruded aluminium.
- Tracks may be anodised where required or painted to blend in with ceiling finishes.
- 1, 2, 3, 4 or 5 track set-ups available.
- Fits into typical ceiling batten spaces - total track height is 36mm.
- Door pick-up system is available where multiple doors are used.

Product Specifications

Single Track



Double Track



Technical Information

Maximum Track Length	6.5m
Maximum Door Thickness	Single - No limit Multi track - 40mm
Track Finish	Single - Natural anodised Multi track - Mill finish
Maximum Door Weight (standard)	240kg
Maximum Door Weight (SofStop)	160kg

How to Specify

1. Specify track configuration and length.
   Cut to specified length up to 6.5m long.
2. Choose Single or Bi-Parting carriage pack.
   M6 (120kg), M8 (240kg) or SofStop (Single/Dual)
   - includes wheel pack, plus all required T-Guides and track stops.
3. Add door pick-up pack for multi-track overtaking door setups.

Installation Notes

Tracks are supplied with pre-drilled fixing holes. 10mm plasterboard, requires packers (supplied) to allow the bottom of the plasterboard to sit flush with track.

Ensure underside of track is level with the underside of the J-Mould. This may require the underside of the track to finish 1-2mm below the underside of the ceiling before stopping.
