

Specifying for sustainability; demystifying systems, products and tools

Keen to specify sustainably but confused about where to start? Get an insight into NZ green rating tools, sustainable paint innovations, the Greenbuild website and how to use the information and tools to build a Green Star NZ specification with confidence.

Presented by Quentin Jackson, Colin Gooch and Alex Ritchie, these two hour free sustainability seminars are brought to you by Resene. Attend and earn 10 NZIA CPD points.

Presenter 1: Quentin Jackson, eCubed Technical Director

Quentin has extensive experience in daylighting design and technology, productivity analysis and post occupancy evaluation. He has completed numerous pre and post occupancy evaluations throughout New Zealand using the UK designed PROBE process. Quentin is a Green Star NZ Accredited Professional.

Quentin will cover:

- Existing NZ rating tools, how they work and how they have developed compared to other countries.
- The future, how the tools will evolve and why.
- Answers to common questions from specifications and assessments of environmental rating tools.
- An insight into what an ESD consultant requires to assess a project.

Presenter 2: Colin Gooch, Resene Technical Director

Colin has worked at Resene for over three decades, most of this as Resene's Technical Director, leading a team of highly qualified chemists developing many world first paint systems. He has pioneered a wide range of paint technologies, with a specialist focus in waterborne systems, and gained Environmental Choice approval for a wide range of Resene products in 1996.

Colin will cover:

- VOCs - a contentious subject.
- The environmental footprint of paint and long term durability.
- Environmental Choice NZ - a paint perspective.
- Resene - the sustainability journey.

Presenter 3: Alex Ritchie, Greenbuild Sustainability Manager

Following academic studies in Environmental Management and focusing his Master's dissertation on the large scale provision of resource-efficient houses in the UK, Alex joined the National Centre for Business and Sustainability, providing guidance on waste management strategies, integrated recycling projects and environmental management systems. Alex is responsible for ensuring that Greenbuild succeeds by responding to the present and future needs of architects and specifiers, enabling a faster, better and more reliable materials selection process.

Alex will cover

- The Green Building Council and Green Star NZ connection.
- Greenbuild website.
- How to use the information and tools to build a Green Star NZ Specification with confidence.

Each seminar runs for approx 2 hours. Attend and earn 10 CPD points.
This is an education seminar and therefore only light refreshments will be served.

*Want to hear more? Then don't delay, book your place today! Space strictly limited.
