

Autex Insulation

Safe, non-toxic Insulation

Autex GreenStuf® and QuietStuf® insulation products are good for you, and our environment – forever !

GreenStuf® thermal and QuietStuf® acoustic insulation products are made from 100% polyester fibres. There are no binding agents, retardants or chemicals added and that means they remain safe for you, your clients and our environment.

There are no known hazards with the use or handling of Autex polyester insulation. The fibres are not of a respirable size and will never become a potential airborne pollutant, reducing the risk of “sick building syndrome” and providing safer indoor air quality.

Autex polyester well exceeds the leading world Volatile Organic Compound (VOC) standards established by ‘Good Environmental Choice Australia ‘ (GECA) and ‘The GreenGuard Environmental Institute’.

GreenGuard VOC standards are the recommended maximum levels established by the US National Toxicology Program (NTP), the International Association for Research on Cancer (IARC) and the World Health Organization (WHO).

Autex polyester insulation has been tested by Cetec Pty Ltd (Report: RCV080408) for chemical emission as follows;

VOC Concentration: 0.01 mg/m³ (7 Days)

GECA/ GreenGuard Limit: 0.25 mg/m³ (7 Days)

GreenStuf® and QuietStuf® insulation products all contain already recycled polyester fibre (from PET plastic) and remain completely recyclable indefinitely. That means these products never need to enter the waste stream.

The first of Autex’s GreenStuf® products have just been awarded Environmental Choice New Zealand accreditation providing architects and designers with greater choice when specifying insulation products into “green” buildings.

Manufacturing processes, energy efficiency, waste minimization programs, and higher product thermal performance are all taken into account for ECNZ certification. Autex’s new GreenStuf® R3.2 & R3.4 Ceiling products are the first of the range to be endorsed, and more will be added in the coming months.

You have the choice to secure peace of mind in knowing that what you specify and use today will be safe for you and our environment – forever. For a better future specify Autex GreenStuf® and QuietStuf® quality polyester insulation.
