

LAMINEX® DESIGNED TIMBER VENEER PANELS

Laminex®
Inspire your space

LAMINEX® DESIGNED TIMBER VENEER PANELS

Made from reconstructed veneers, Laminex® Designed Timber Veneer panels are an inspired choice. Rich in colour and character, they provide a sophisticated alternative to solid wood. Each decor is meticulously selected, then carefully crafted to ensure the very best quality and consistency. Each panel is made to order with your veneer being pressed onto high quality substrate. Matching edging is available to perfectly complete the veneer panel. Whether you're creating joinery, high quality furniture, feature walls or kitchen cabinetry, you can achieve a beautiful look and finish.

A SUSTAINABLE DESIGN SOLUTION

Laminex® Designed Timber Veneer panels are good for both you and the environment. To achieve the same beautiful look of solid timber, far less wood is required. This means fewer trees are needed to achieve your surface design and the impact on forests is reduced. In addition, you can be sure wherever MDF substrates are used they're sourced from sustainable forests in New Zealand, in moisture resistant and E0 specification.

Laminex® Designed Timber Veneer panels create a smooth, even colour and grain thanks to the unique manufacturing process. Layers of peeled logs are carefully dyed, reformed, re-cut and glued to create matching leaves. The result is a brilliantly finished product that provides outstanding consistency and endless inspiration.

APPLICATIONS

- Commercial and residential interiors,* particularly projects that require a consistent pattern and colour
- Furniture and joinery
- Shop and restaurant fittings
- Reception areas and hotel fitouts
- Homeware accessories
- Feature walls and paneling

*Laminex Designed Timber Veneer panels are for interior applications only

FINISHING

All Laminex® Designed Timber Veneer panels are supplied sanded, trimmed and unfinished, and will require polishing allowing for customisation at the finishing phase. Please ensure the polishing instructions provided by the polish supplier are strictly adhered to. In addition to polishing, it is recommended that all panels are finished with a non-yellowing UV inhibitor and 2 pac polyurethane to protect the colour of the veneer. The same coating system and processing methods should be used across the entire project to ensure final colour consistency.

CONCEPTS RANGE

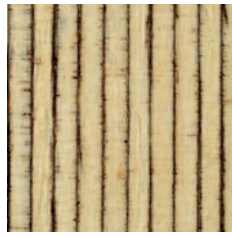

The Concepts range offers a simple selection of interior colours that reflect the current design trends. Ideal for commercial projects and shop fittings, it boasts understated patterns and a consistent grain.

LEGEND C Crown Cut 1/4 Quarter Cut F Finline

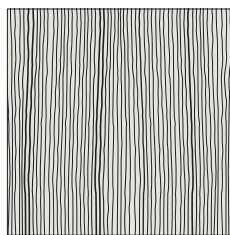

All veneer is laid up as slipmatched.

VENEER CUTS

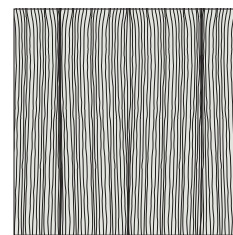

Crown Cut pattern

Characterised by straight grain intermixed with Cathedrals - one of the most popular cuts.

Quarter Cut Rigato

This is a linear grain effect for a consistent veneer appearance.

Finline

The fine grain of Finline has been created to give a delicate, modest pattern. This ensures the colour of the veneer is highlighted.

Laminex Designed Timber Veneer (DTV) panels are marketed and distributed by The Laminex Group, a division of *FLETCHER BUILDING PRODUCTS LTD*. The colours and finishes of the products featured within the imagery in this brochure are as close to Laminex DTV panels as photographic lighting and our printing processes will allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. Laminex Timber Veneer panels are no different to most other materials in that darker colours will show scratches and superficial wear and tear more readily than lighter colours. Veneer products, including Laminex DTV panels, being comprised of natural timbers will react to direct and indirect light. Therefore, a change of the surface colour and appearance over time is a natural characteristic, not a defect. Additionally, heat and humidity will interact with light to accelerate the ageing process. **VENEER SELECTION** - As the environment may have a significant and variable effect on timber veneers and other natural wood products, there is a range of considerations that may bear upon the choice of an appropriate veneer or coating for a particular location or environment. The Laminex Group recommends that you seek expert advice when deciding on the appropriate veneer and finish for particular conditions. Please obtain a copy of the terms and conditions of the Laminex DTV panels 7 year limited warranty from The Laminex Group or visit laminex.co.nz for more information. This warranty is in addition to any rights that may exist under the Consumer Guarantees Act (1993).
