

Pre-Aged Pure Zinc Spouting and Downpipes

Smooth, Elegant, Natural Metal

- 99.995% pure zinc with minute additives of copper and titanium
- Over time develops a natural grey “patina” which protects the surface against corrosion
- Titan Zinc has been “pre-aged” to speed up the formation of this protective patina
- Evidence shows that the smooth finish of Titan Zinc resists salt adhesion, making it perfect for waterfront conditions
- Zinc has a life expectancy of over 100 years, as seen in many European historical buildings
- Titan Zinc “self repairs” if scratched or damaged thus protecting itself against corrosion
- No maintenance required

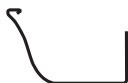

from

From a name known and trusted to supply and install high quality spouting and downpipes, Titan Zinc is available in the following profiles:

1/2 round

1/4 round

O.G 125

- Titan Zinc is available in a 0.7mm coil guage
- All components are colour matched, including our external and internal aluminium brackets
- 65mm and 80mm downpipes are available with colour matched, powdercoated pre-cast zinc bends
