

FROM SPEC TO PROTECT

FORMULATED TO LAST.

FIRETEX® FX6002 has been designed as an ultra-fast drying intumescent to significantly increase productivity when applying fire protection. The second generation of Sherwin-Williams' FX6000-series patented technology delivers much more than speed. With a superior and easy to apply finish, FX6002 helps designers to obtain aesthetically pleasing fire protection to exposed structural steel surfaces. By extending the scope of protection across a wider range of steel work and fire scenarios, FX6002 allows its unique combination of high durability, efficiency of installation and aesthetic benefits to be enjoyed widely whatever the project needs are.
