3M Commercial Air Barrier
Membrane and Flashing Solutions

The elements don't slow you down. Don't let your materials, either.

3M Air Barrier Membrane and Flashing Solutions

- ✓ High tack, proprietary acrylic adhesive can be applied in extreme heat to well below freezing and wet conditions
- ✓ No primer required
- ✓ Can be applied in temps as low as 0°F (-17°C) or as high as 150°F (80°C)
- ✓ Sticks and stays on concrete, concrete block, anodized aluminum, galvanized metal, plywood and most exterior gypsum boards
- ✓ Resists UV exposure for up to 12 months
- ✓ NFPA 285 compliant*

*As part of an approved wall assembly

Winter Weather Shouldn't Stop You Cold

Time is money, and you can't stop a project just because it freezes. The acrylic adhesive on our air barrier and flashing tapes is specially formulated to **stick at temperatures down to 0°F (-17°C)** so you can keep applying it when the mercury drops.

UV Exposure Won't Let Up and Neither Will You

With facade installation sometimes delayed for months at a time, it's critical to ensure your building is enclosed and protected. Our air barriers and flashing tapes are specially formulated to **withstand up to 12 months of UV exposure** so your project can last as long as the days of summer.

Materials that Stick With You — Even in the Wind and Rain

Wind and rain are a fact of life, and you want to spend time applying materials, not cleaning them up. **Our proprietary acrylic offers immediate tack, even without a primer, to help you withstand the storm.** Our products are also immediately rain-safe when applied, so you can keep working right up until it actually starts raining.

We'll Help You Get Out of a Tight Spot Fast

Details are important — getting 1% of a flashing, seaming or sealing job wrong can ruin the other 99%, and rework is usually more complicated than just slapping on a patch. **Our products are extremely conformable and elongate in multiple directions** so you can get a good seal around corners and awkward shapes.

Adhesives and Backings Built Compatible for the World Around Them

With project deadlines on the horizon you can't afford to let your materials slow you down. Look to 3M air barrier technology to save time without primers or solvents and to stay on schedule. **Our products are also highly compatible with other materials,** whether you need it to stick to something or something to stick to it.

Non-Permeable Membrane — Engineered to help control indoor climate by reducing air leakage and uncontrolled airflow through the building envelope and preventing moisture ingress.

3M™ Air and Vapor Barrier 3015

- High-tack acrylic adhesive enables installation in most weather conditions
- Translucent membrane makes it easy to identify stud locations

Permeable Membrane — Designed to prevent water penetration while allowing your building to breathe.

3M™ Air Barrier with Permeable Backing 3015VP

- Engineered to provide exacting control over moisture, air and vapor
- Reverse-wound rolls allow for faster installation

Flashing Accessories — Designed for multidirectional applications in commercial buildings, enabling fast and easy detailing of windows, doors and penetrations.

3M™ Ultra Conformable Flashing Tape 3015UC

- Extremely flexible tape stretches horizontally and vertically and conforms around corners
- Enables up to 40% faster window and door detailing

3M™ Air & Vapor Through Wall Flashing Tape 3015TWF

- Exceptional puncture and abrasion resistance
- Specially designed for use as a through wall flashing and damp proof course

3M™ 8067 All Weather Flashing Tape

- For detailing doors, windows and pre-fab joints
- Thin film design prevents tape buildup in the corners

3M™ Permeable Liquid Flashing Membrane 3015LF

- Ideal for complex penetrations or where a vapor permeable flashing system is needed
- Fast-drying, STPE-based liquid flashing allows for easy roll, brush or spray-on application

Product Selection and Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property. **Warranty, Limited Remedy, and Disclaimer:** Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price. **Limitation of Liability:** Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
