

200 SUPER ROOF LITE CURVED

introducing a new generation of opening roofs

Super Roof Lite Curved is the third and newest addition to the series of three Super Roofs. Designed by request from a Sydney architect for a prestigious project on Sydney Harbour, Super Roof Lite Curved offers identical spanning capabilities to the Super Roof Lite system.

Both Super Roof Lites span up to 4500mm in medium wind zones and offer excellent spanning capacity for the majority of residential applications. Now comes with a 185mm extra wide gutter to all four sides as standard.

Choose from the clean angular lines of Super Roof Lite, or the softer rounded look of Super Roof Lite Curved.
