

OVERVIEW SCREENING + VENTILATION

## SCREENING & VENTILATION

final finishing touch

Louvretec can supply a wide range of screening and ventilation grills and louvres.

These can range from traditional extruded shapes to more custom designed panels using Louvretec's architectural louvres.

Light, airflow, privacy, screening and security can all be controlled with well designed grills and louvres.

Vermin, bird or insect screening can be incorporated with any of the louvre systems.

Typical applications are to provide screening to cooling towers, ventilation to plant rooms, car park spaces, basement areas and the like.

Please contact Louvretec for additional information.
