Designed Smart, Built Tough.

Top Durable Quality Combined with Classical Elegance

Our Masons Soffit Linings consists of solid and perforated PVC boards, J and H strips, as well as an outer corner strip.

Mason Soffit ensures an aesthetic and durable finish.

It is weather resistant and requires no maintenance, so is the best choice for long-lasting satisfaction.

Why choose Masons Soffit?

WOOD TEXTURE

A soffit lining finished with a texture and wood-like veneer perfectly imitates natural characteristics of timber whether stained or painted.

LOW WEIGHT

Low weight of our system facilitates installation on delicate structures without any loads imposed on roof structures.

SAVE TIME

Frame out, install boards and trim - done!
No painting is required.

VERY LOW MAINTENANCE

The soffit element material is so durable that limited care or maintenance activities are required apart from the occasional low pressure wash down.

PERFORATED

Choose Masons perforated soffits toward a naturally ventilated healthy roof space.

FIRE RETARDANT

Masons soffit are fire retardant, and so use with confidence.

Installation of a Soffit Lining

The soffit boards require battens or blocks to be installed between the rafters or soffit framing adjacent to the fascia board, and next to the cladding if no ribbon board fitted. Fit battens flush and level to the lower face of soffit framing.

For full instructions please visit mpb.co.nz

- Installation of the soffit boards perpendicular to the cladding surface is recommended.
- Maximum recommended span is 400mm.
- Installation should be completed when ambient temperature is 5°C or above .
- Masons soffits should not be installed where exposed to direct sunlight.
