Metdek 500 Installation Details

The installation details for Metdek 500 are similar to Metdek 400. Therefore Metalcraft Roofing has currently not produced specific details for Metdek 500. We hope this is acceptable as it has been in the past.

In terms of flashings and installation details for Metdek 500 Please use the Metdek 400 set.

Should you wish to exchange the Metdek 400 profile with Metdek 500 then the Metdek 500 profile can be found on the Metalcraft Profile drawing.

Please reference also the specific loadspan; fixing tables and specification for Metdek 500.

Should you require and appreciate that Metalcraft Roofing produce Metdek 500 standard details then please put a request through to:

frances.charles@unitedindustries.co.nz.

We will produce these details as soon as possible but please allow one- two weeks for this to happen.

Loadspan and fixing tables and Metalcraft profile drawings are available to download from www.metalcraftgroup.co.nz
