

# RESORTDECK

FOR A PREMIUM MATTE FINISH

ResortDeck with UltraShield combines the natural beauty of a freshly oiled timber decking with the extra benefits of durability, dimensional stability and easy care properties.

The board core is made from 95% recyclable materials: 35-40% high density polyethylene and 60-65% wood fiber. The co-extruded polymer shield completely encapsulates the board in an impermeable layer of protection the boards from moisture.

ResortDeck uses 4th generation composite technology resulting in superior UV protection, fade and mould resistance. The boards are splinter-free, do not leech, the need for staining, oiling and painting is eliminated. The subtle colour variation is the result of a colourmix technology making every board unique.

The ResortDeck collection is available in six natural colours and finishes to complement all styles of architecture from modern to classic.

The staggered, 'rustic' board layout is visually pleasing, as breaker boards are generally not required.

Outdure's suite of durable, concealed fastenings, including the patented QwickClip range which twist to hold the boards into place.

Integrate QwickGrates with the boards for ventilation and access to services.

*Please refer to actual decking samples for accurate colours and texture.*
