StarTread

Entrance System

pg 1/2

Manufacturer

Advance Flooring Systems Limited

Trade Name

StarTread

Product Description

An 15mm deep aluminium strip mat system with polypropylene inserts for entrance areas.

Product Benefit

StarTread is an entrance mat system engineered to trap soiling and moisture that is easy to clean and protects flooring surfaces inside. StarTread has an interlocking aluminium base easy installation and cleaning.

StarTread provides excellent slip resistance mitigating the risk of slips and falls causing injury.

Area of Application

StarTread is ideal for high levels of foot traffic for any commercial entry application such as commercial premises, public spaces and hotels. StarTread is to be used indoors or in weather protected areas.

Composition

StarTread is manufactured with continuous mill finish aluminium interlocking strips, molded anti-clatter feet and polypropylene carpet inserts.

Dimensions

Strip depth	15mm
Overall tread size	40mm

Appearance

Mill finish aluminium interlocking strip system available in a range of 6 polypropylene insert colours.

Manufacture

StarTread is manufactured by Advance Flooring systems to its copyright design.

Smoke/Fire

The polypropylene carpet has been tested and exceeds the AU & NZ requirements

Slip Test

StarTread has been tested and exceeds the AS/NZS 4586: 2004 NZ & AS 4586: 2013 AU requirements.

Durability

Heavy Commercial.

UV Resistance

Some fading of the polypropylene carpet inserts may be observed in areas of intense sunlight. Aluminium inserts are not affected.

Sustainability

Advance Flooring Systems is committed to the protection of the environment. StarTread is designed to minimise environmental impacts during manufacture and engineered to last a long first lifecycle supported by a 10 year warranty.

Installation

StarTread tiles must be installed by a competent and experienced installer, more information on the recommended installation procedures is available on our website www.advanceflooringsystems.com or upon request.

Cleaning and Maintenance

StarTread has low maintenance requirements and can be rolled up and removed for cleaning as excessive dirt if required. Special dirt collection zones and polypropylene infills gather dirt for simple and effective cleaning.

Daily Maintenance: Vacuum StarTread thoroughly with a powerful vacuum cleaner preferably with power driven brushes. This agitates the pile to loosen the trapped dirt.

Periodic Maintenance: A routine visual inspection will identify when StarTread is becoming embedded with dirt which can be removed by a water spray extraction method. Alternatively, StarTread can be scrubbed by machine or hand, rinse thoroughly using a wet and dry vacuum cleaner. In cases of staining, household solvents may be used, however must only be applied to a rag and rubbed onto the pile. Do not pour solvents directly onto the mat as a breakdown of the infill adhesive may result. More information on the recommended maintenance procedures is available on our website www.advanceflooringsystems.com or upon request.

Warranty

Advance Flooring Systems provides a ten (10) year product warranty, that the product will be free of manufacturing defects and the product is maintained according to the manufacturers maintenance instructions, subject to fair wear and tear.
