MACDONALD INDUSTRIES LIMITED TECHNICAL DATA SHEET

FRFM1 STAINLESS STEEL FLOOR MOUNTED TOILET PAN - THROUGH WALL BOLTED

DESCRIPTION

Franke floor mounted back to wall stainless steel WCs are built for installation in areas where vandalism is likely to cause damage to ceramic WCs. Fabricated in 1.6mm Type 304 stainless steel with a satin finish, these are available with or without seats or alternatively with seat pads fitted.

All Franke WC's are designed to flush with 6L of water. They are 3 Star WELS rated when installed with a similarly rated flushing device.

They are designed for through wall mounting, using 4 x 16mm galvinised steel bolts supplied with each WC. It is most suitable for high security applications where there is an accessible plumbing duct located directly behind the WC.

INSTALLATION

Refer to page 2 for installation options. Where there is no plumbing duct, use the face wall fixed FRFM2.

MODELS

FRFM1 - Back wall, through wall mounted WC

OPTIONS:

- **FRSP** Grey plastic seat pads **FRSW** - White plastic seat
- **FRSB** Black plastic seat
