for easy installation

The do-it-yourself Tile

Installing DumaWall is quick and easy, where there is now no need to work with complicated grout lines, tools and costs associated with Ceramic tiles. DumaWall tiles provides the look of Ceramic tiles, features an interlocking tongue and groove system and can be easily cut on site with circular skillsaw or jigsaw, providing the ideal home handyman solution at minimal costs compared to a professional tiler.

Easy to glue with DumaFix

DumaFix is a high-quality, quick hardening adhesive based on an MS polymer. DumaFix is suitable for fixing and installing DumaWall+ tiles, DumaWall XL panels and trims on basically any surface (porous and nonporous surfaces).

NOTE: All wet wall substrates that DumaWall is to be adhered to must be waterproofed. More info visit www.building.govt.nz - Code of practice for internal wet area membrane systems.
