

ALPOLIC®/fr

**PSP** MATERIALS  
PRODUCTS  
SOLUTIONS

PSP ALPOLIC®/fr surface coatings are finished with a high performance Lumiflon-based fluoropolymer coating (FEVE) as standard. With the reverse side coated with polyester-based wash coating or service coating to protect it from any potential corrosion issues.

This coating system has many benefits over traditional PVDF coatings such as durability, wider range of gloss levels and effects like sparking, metallic and prismatic.

### Features

- Fire-retardant mineral filled core (Passes NFPA285 and ISO9705 Group 1)
- Coated with LUMIFLON™ - based FEVE fluoropolymer paint with a 20 year warranty\*
- Available with a gloss level of 15% to 80%
- Triple coat finish, the third layer is a protective clear coat
- 15 year delamination warranty\*
- Withstands up to 5kpa wind loading exceeding NZS4284 (4.0mm sheet)
- A range of stocked colours with over 200 colours available on indent
- A2 High fire-retardant core option available on indent

### Applications

- Commercial, high-rise & curtain-wall cladding
- Domestic cladding
- Fascia
- Fire-rated wall linings & ceilings
- Feature walls
- Corporate signage
- Petrol station & train station canopies
