The do-it-yourself Tile

Installing DumaWall is quick and easy. Our tiles do not require grout or the numerous tools, associated costs & mess that are related to traditional tiling. DumaWall tiles provide the look of traditional tiles. Featuring a simple interlocking tongue and groove system. DumaWall can be easily cut on site with circular, hand saw or jigsaw, providing the ideal home handyman solution at a fraction of the costs compared to a professional tiler.

Easy to glue with DumaFix

DumaFix is a high-quality, MS polymer based, fast curing Hi Tack Adhesive & Sealant. DumaFix is suitable for fixing and installing DumaWall+ tiles - DumaWall XL panels & trims, on basically any (porous and non-porous) surfaces.

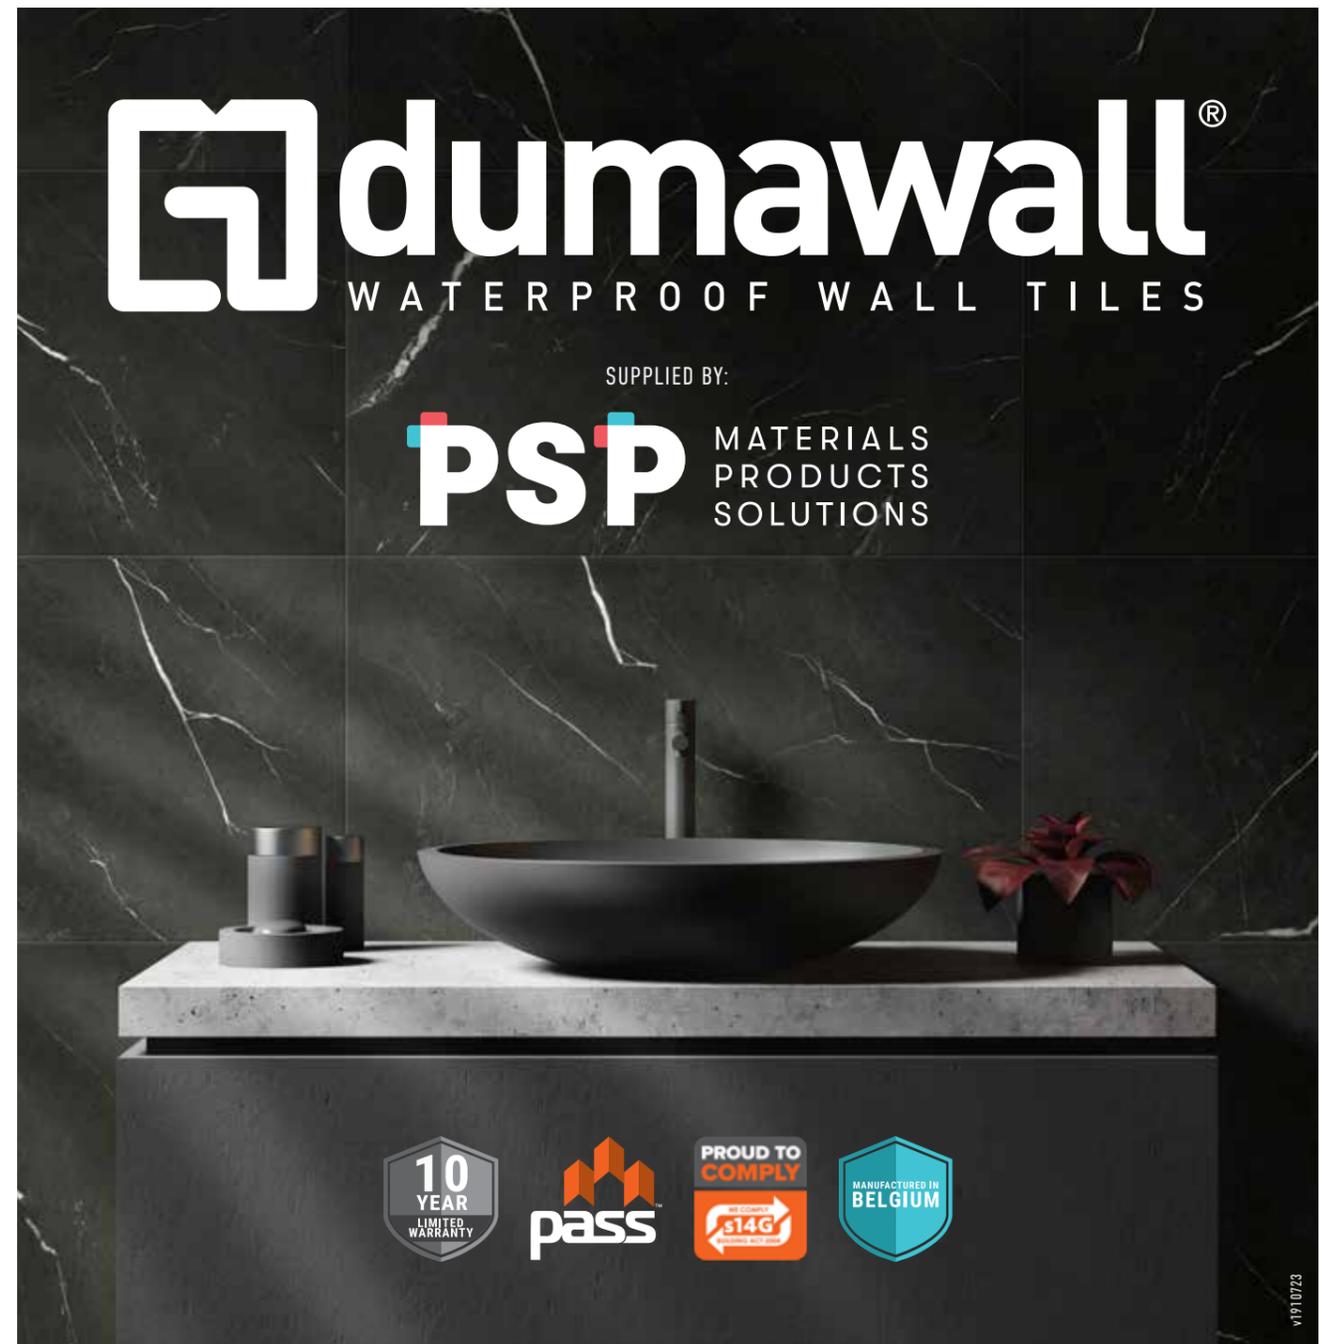

NOTE: All new wet wall areas such as shower boxes, must be waterproofed over an approved wet wall substrate prior DumaWall being installed. For more info visit www.building.govt.nz - Code of practice for internal wet area membrane systems. DumaWall can be retrofitted over existing approved shower boxes such as tiles and branded aqua linings.

DumaWall is a lightweight and easy to install waterproof wall tile/panel. Produced with the revolutionary patented RCB[®] (Rigid Core Board) technology, featuring an interlocking tongue and groove system and can be installed over existing walls making it ideal for renovation projects and new builds. Removing the chill from cold tiled bathrooms making them noticeably warmer.

DumaWall is durable, 100% recyclable, Pass[™] certified with compliance to the New Zealand Building code. Typical Applications include Bathrooms/Shower Walls, Kitchens, Laundry, Feature Walls, Changing Rooms & Vanity/Mirror Surrounds.

Note: Due to different production processes between the DumaWall XL and DumaWall+ there could be slight colour differences if both products are installed in the same room.
