

## CARE & MAINTENANCE

### Marblo® Designer Bath-ware

Congratulations on your purchase of Marblo® designer bath-ware. Created to be non-porous, the clever Marblo® chemistry will prohibit liquids and chemicals being absorbed. The result is an easy care and hygienic surface. Although Marblo® surfaces are tough and durable, they are not indestructible. They will require regular maintenance to keep the product's surfaces at their best.

As with most things in life, prevention is better than cure, so please read the recommendations below to ensure that you enjoy years of service from your investment in Marblo®.

#### 1. Day-to-day

After use, remove any residue from soap, shaving, or brackish water by rinsing and a quick wipe over with a damp sponge or cloth.

#### 2. Regular Bathroom Cleaning

When conducting your regular bathroom cleaning, simply wipe over the surface of your Marblo® bath-ware product with a mix of 5% Lemon Jif\*\* Cream Cleanser to 95% diluted dishwashing liquid. An ammonia-based cleaner such as Spray-and-Wipe™\* can also be used. Rinse and wipe over using a clean damp sponge.

To remove build-up of lime, hard water scale or soap residue, use a standard household lime remover, rinse well.

#### 3. Spills

If a spill of dye, nail polish, harsh household chemicals or the like occurs, in most cases staining can be prevented with minimal effort. Immediately rinse using appropriate safety measures, and wipe over with warm soapy water.

Clean the entire surface using a mix of 5% Lemon Jif\*\* to 95% diluted dishwashing liquid applied using a damp sponge. If the spill has not been totally removed, clean the entire surface with Lemon Jif\*\* Cream Cleanser and a wet sponge, in a circular motion. To maintain uniformity, do not apply too much pressure nor rub in the same area for a prolonged time. Rinse well and wipe clean.

This will restore a matte / sheen luster to the surface of your product. If your Marblo® product is a gloss finish, please contact your local Marblo® office for specific advice.

#### 4. Stubborn Stains, Light scuffs & Cigarette Burns

Apply Lemon Jif\*\* to the entire surface, using a damp grey Scotch-Brite\*\*\* pad rub in a wide circular motion. Be sure not to apply too much pressure nor rub in the same area for a prolonged time.

Before rinsing, clean the entire surface using a very wet sponge in a wide circular motion. Rinse well and clean.

A matte / sheen luster will result. For gloss finishes, please contact our customer support team.

#### 5. Prevention

Do not use abrasive cleaners, steel wool, metal implements or objects with sharp edges on the surface of your Marblo® bathroom-ware product.

Excessive heat, naked flames, ultraviolet radiation or harsh chemicals may also cause damage to your Marblo® surface.

In most cases, Marblo® will withstand even this abuse by following the rejuvenation process outlined in item 4. Stubborn Stains, Light Scuffs and Cigarette Burns.

In the unlikely event of a problem with your Marblo® Product or to learn more about caring for your Product, please contact your local Marblo® office or visit [www.marblo.com.au](http://www.marblo.com.au).
