**Data Sheet**

# Emergency Access Doorset

## Description

The Pacific Emergency Access door set is intended for toilets in hospitals and similar situations where emergency access may be required.

The door typically opens into the toilet for reasons of privacy and so as not to obstruct the passageway when opened. However the door can become blocked if the occupant collapses in a position lying against the inside of the door.

The Emergency Access door set has a pivoting action and a retractable stop to enable the door to be opened outward in case of emergency.

The door set consists of a solid-core flush-panel door leaf pivoted in a steel frame.

The door set can be supplied for interior use in dry or wet areas. Note that wet area doors must be identified at time of order.

The Emergency Access door set has a specific handing, LH (Left Hand) or RH (Right Hand), because of the orientation of the retractable door stop.

## Product options

### Leaf Type

Core: Solid Core

Cappings: Pacific anodised aluminium extrusion capping to long edges.

Facings: High Pressure Laminate (e.g. Formica or HPL) or sheet Vinyl (preferably flooring grade) over Medium Density Fibreboard.

Leaf Thickness: Nominal 47mm thick.

Leaf Sizes: The Emergency Access door set is available for manufacture to any practical size to suit client requirements. Thought should be given to the available sizes of leaf facings so that there are no visible joins, and so that the structural integrity of the door is not compromised.

Public

## Leaf Facings

The facings listed below are available for the Emergency Access door set

- MDF
- Oil Tempered Hardboard
- Hardboard
- Plywood
- Timber Veneers
- Metal Sheet, mild or stainless (0.6 - 1.0mm)
- Aluminium Sheet (0.3 - 1.0mm)
- High Pressure Laminate up to 1.5mm thick (eg: Laminex, Formica)
- Sheet Vinyl (1.25 - 2mm)

## Leaf Edges

The Pacific Hospital door set includes aluminium extrusion capping to the two long edges. Standard finish is natural anodized (silver). Other leaf edges are available upon request.

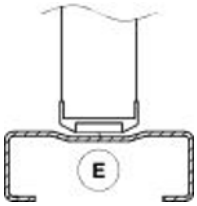

## Frame Types & Profiles

**Timber Frame**

Emergency Access doors are only available in a steel frame.

**Steel Frame**

The steel frame profiles listed below are available for the Emergency Access door set.

Standard frames are three-sided only, with no sill. Four-sided frames and/or custom sills may be available on request. For more in-depth information on frame profiles and sizes, please see our Installation Instructions.

**Meeting Stiles**

This door set is not available as a pair of door set.

**Hardware**

The Emergency Access door set is supplied fitted with pivot hardware and a retractable stop.

Additional latching hardware and furniture can be fitted (by others) on site. The door frame can be prepared for standard mortice lock hardware, with a custom strike plate, if required.
