# The StyleLex system

StyleLex is available as individual components or a complete system from EGR Decor

## Face panels – 18mm

StyleLex face panels consist of a weatherable HPL laminated to Weatherproof Composite Core (WCC) and are designed for cabinets and joinery in outdoor areas.

## Carcass panels – 18mm and 16mm

Carcass panels consist of ABS (18mm) and HPL (16mm) faces laminated to Weatherproof Composite Core (WCC). Carcass panels can be used for cabinet structure, kickboards, base frames and drawer bases.

## Edge banding – 23 x 1mm

Edge banding gives the perfect finish to your outdoor kitchen.

Doors made from Stylelex face panels attached to cabinet structure. Bench top material used for gable ends.

Cabinet structure and kickboard constructed using StyleLex carcass panels.

Diagram shows the complete system with edge banding being used on the doors and gables to complete the cabinet.

# Application guide

## Overview

The StyleLex panel system is designed for outdoor covered area use. The system is ideal for the manufacture of cabinets and joinery in Alfresco kitchens and entertainment areas.

## Positioning and Design

StyleLex panels must be positioned in a covered and shaded area where they are not exposed to direct sunlight on the property throughout the year.

StyleLex panels are combustible and precautions regarding gas cook tops and barbeques need to be taken in consultation with the relevant gas standards and fire protection codes to ensure the minimum clearances and suitable ventilation is maintained.

## Fabrication

StyleLex panels are easily handled and can be processed rapidly using conventional decorative panel woodworking equipment and assembly techniques.

## Care and Maintenance

StyleLex surfaces feature a high resistance to staining and are easy to maintain using a clean and damp microfibre cloth using warm soapy water.

## Unsuitable applications

StyleLex panels are not designed for structural applications or external wall and ceiling cladding

Exposed gable ends should not be used. Outdoor rated bench top finishes or building cladding materials are suitable.

StyleLex panels are weatherproof but are not designed for long term immersion in water or other liquids.

Refer to the detailed installation and specifications guide at [www.stylelex.net](http://www.stylelex.net).

## Guaranteed Quality

All StyleLex panels are laminated by EGR using our premier polyurethane (PUR) reactive hot melt bonding system.

EGR's facilities have been recognised for achieving ISO9001 Quality Management certification for their consistent performance and integrated quality assurance systems.

## StyleLex vs Compact Laminate Comparison

## Specifications
