

PROFILED STEEL ROOF CLADDING - CLIPPED SYSTEM
 Ventilated Ridge Barge Detail

Use this method to provide ventilation to trussed roofs only.
 Vent **VB20** also required for skillion roofs

Main contractor to ensure correct placement of purlins for fixing of Ridge Barge Vent

The Ridge/Barge flashing is to be supplied by the roof cladding supplier.
 Refer to E2/AS1 for minimum values of X & Z, recommend 200mm min at X to hide flashing tape

THIS IS A SUGGESTED METHOD OF VENTILATION BUT THE OVERALL DESIGN AND DIMENSIONS ARE THE RESPONSABILITY OF THE DESIGNER IN COMPLIANCE WITH THE NZ BUILDING CODE.
