

# IBS Hardcore Formply IBS Builders Grade Formply

## Why IBS?

Since 1993, IBS has been working with the top building products producers from around the world to bring New Zealand a panel product range to help Kiwis build better.

We're always looking for what product is new and improved in the world market as well as developing new products right here in New Zealand. Our products go through a rigorous internal testing process as well as being third party verified to ensure that they are certified to comply with New Zealand building code requirements and standards.

We also make sure that our products are supplied from a sustainable renewable resource.

### IBS Mission Statement

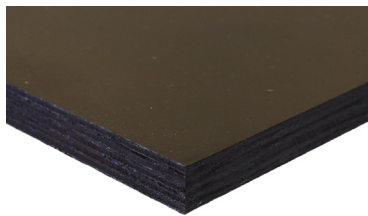

IBS strives to be New Zealand's leading provider of quality panel products.

With a vast range of sustainably sourced products from around the world, we aim to give our customers the best service, best product and best range.

The IBS (Independent Building Supplies) team is committed to providing quality building products backed up with testing and documentation to make our products reliable, along with knowing that they come from a sustainable renewable resource.

We search the world and NZ to find the best panel products, test them to make sure that they are the best and send them around the country to help Kiwis build better.

## What is Formply?

Formply is a plywood overlaid on both sides with phenolic paper which is fused onto the surface. It is used for concrete formwork in slabs, pillars, floors, stairs and more. Formply supports concrete prior to it curing. Formply can be reused after concrete has cured.

Formply is dimensionally stable, rigid, light, and easy to install. The cross laminated structure of Formply utilises the inherent strength of wood along its grain, to provide stability even under moisture and temperature changes.

## IBS Formply Standard and Hardcore

IBS Formply standard is a value for money Formply for use in low to moderate impact applications. IBS Formply is manufactured to strict international standards using modern production techniques and high quality raw materials.

For your next concrete project Hardcore Formply can be used. IBS Hardcore Formply brings together the strength and durability of a full hardwood veneer layup with a marine bonded WBP glue line and a 120gm/m<sup>2</sup> Dynea paper overlay. IBS Hardcore Formply is manufactured to strict international standards using modern production techniques and high quality raw materials.

### IBS Formply Standard Benefits

- Climate resistant A grade WBP Phenolic glue line
- Brown film applied to both sides gives a high quality finish
- Re-use 5-8 times each side (provided use as instructed)
- Painted sealed all four edges
- Anti-abrasive, wrinkle resistant and anti-erosive film face
- Reduces costs and avoids disadvantages associated with steel moulds
- Gives a far superior finish than using standard plywood

### IBS Hardcore Standard Benefits

- Climate resistant A grade WBP phenolic glue line
- 120gm/m<sup>2</sup> Stora-Enso Dynea paper overlay for the best finish
- Re-use 5-8 times each side (provided use as instructed)
- Painted with a water resistant paint on all edges
- Anti-abrasive, wrinkle resistant and anti-erosive film face
- Reduces costs and gives you a great high quality finish
- Ticks all the right boxes in testing and comes from a sustainable renewable resource
- FSC certified
