

SPA BATHS

Englefield has a long standing reputation for producing high quality spa baths. All our spas are made from Duracryl® sanitary grade acrylic so you know that they will be hard-wearing, and will maintain their appearance. An Englefield spa bath is not only an investment in your home, but in your well-being.

Information to consider

TYPES & SHAPES

FREESTANDING SPA BATH

A stylish focal point for bathroom design. Add a luxurious feel to your traditional bathing style. Available in the Milano II Air massage bath only.

DROP-IN SPA BATH

Hob-mounted or installed in corner or alcove.

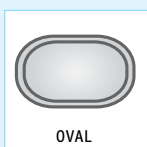

RECTANGULAR SPA BATH

The straight forward solution for clean lines and easy installation.

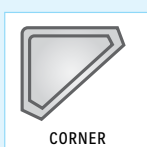

OVAL SPA BATH

Classic luxury with a modern twist. Can be used in traditional or contemporary bathrooms.

CORNER SPA BATH

A striking design feature and solution to awkward layout problems.

ACCESSORIES

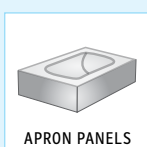

BATH WALLS

Ready made water proof acrylic panels that enable you to install a shower over your bath with confidence. **3 sided bath walls made to order.**

BATH APRON PANELS

A professional finish to your bath that is quick and easy to install.

BATH WASTES

Chrome plated 40mm bath wastes are now available with or without an overflow.

40mm Bath Waste 99329A-CP

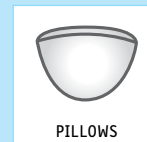

40mm Bath Waste with Overflow 99330A-CP

PILLOWS

For additional comfort and help you relax.

We have included a bath pillow with your spa to add a little luxury at bathtime (selected styles only, otherwise available as an optional extra).

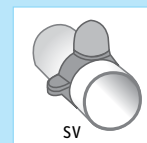

SPA BATH FEATURES

BODYGUARD® SAFETY VALVE

Designed to prevent bather injury.

Patented Bodyguard® protects you and your family by detecting blockages in the suction valve and automatically reduces suction allowing the blockage to be cleared.

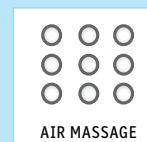

AIR MASSAGE TECHNOLOGY

The ultimate bathing experience for the new generation.

Immerse yourself in comfort while being massaged by thousands of soothing air bubbles that invigorate tired muscles.

Tiny air bubbles deliver an invigorating massaging effect to your skin. This helps the body's own repair mechanisms – helping in the relief of minor strains and pain of the muscles.

WATER JET TECHNOLOGY

A series of jets are designed and strategically positioned around the spa bath to maximise the massaging effect to soothe muscle tensions and help you unwind. The water pressure can be adjusted in each jet to create the intensity that your body needs.

The greater the number of jets the greater the massaging action.

When targeted on tense and sore muscles they deliver a deep tissue massage to provide effective relief.

WHITE SLIMJET™

Clean and uncluttered design for the modern bathroom.

Opt for the White SlimJets for an ultra modern clean look for your bathroom while maximising your reclining comfort.

IMPORTANT TO KNOW

WARRANTY

Acrylic shell, 5 years. Electronic pumps, fittings & components, 1 year.

Pump location: There are set locations for spa pumps. Check the pump location information when ordering. Your spa baths will be assembled to this specification. Please note tapware, waste and accessories illustrated in photography are not included. Recommended Retail Price (RRP) includes GST of 15%. (RRP subject to change). Water Level: We recommend that users fill their spas to 40cm above the jets before operating.

HYDROTHERAPY MASSAGE SPA BATHS

Invest in your wellbeing and create a soothing massage effect in the warmth and comfort of your home.

Englefield's range of Hydrotherapy spa baths bring together modern design with the long-established benefits of water. The combined effects of heat, gravity relief and massage, provide a soothing relief for the rigours of today's modern living.

The Hydrotherapy spa baths feature innovative developments in lumbar and massage jet technology for the ultimate in stress relief. It is simple to adjust the water temperature and pressure of the jets so you can easily transform a gentle relaxing moment into a deeply penetrating massage.

JET SPA BATHS

Come home to enjoy a total relaxation experience while being massaged by powerful jets of water to soothe tired muscles.

Discover the power of Englefield's jet technology to give your body a targeted massage experience to help ease the tensions of the day. A series of jets are designed and strategically positioned around the spa bath to maximise the massaging effect to soothe muscle tensions and help you unwind.

Each jet is individually adjustable to create the intensity that suits your body needs. The body jets are designed to target those tired calf and thigh muscles while the back jets provide relief for the hips and lower back.

AIRMASSAGE™ TECHNOLOGY

Experience a unique bathing sensation as you immerse in style and comfort while being massaged by thousands of soothing air bubbles that invigorate the whole body.

AIRMASSAGE MINI AIR JETS

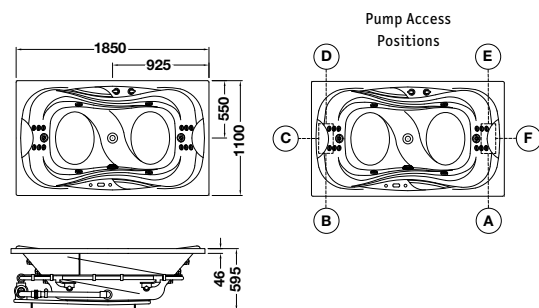

Your new Englefield AirMassage™ Bath is fitted with a set of 30-36 mini air jets that produce a series of tiny air bubbles that deliver an invigorating massaging effect to your skin. The mini air jets are colour-matched to your bath and only measure at 12mm in diameter for a clean, almost invisible look. Your AirMassage™ experience will begin with just one easy touch of the switch.

Features up close

Protect yourself, your home and your family with Englefield's spa-safe technology.

SPA BATH FEATURES

A. DIVERTER VALVES

These are used to adjust water flow to the back jet region of the bath, allowing you to customise your spa experience. Available in the Evora and Ario spa models only.

B. BACK JETS

The back jet system helps loosen tension throughout the back and shoulders. Water flow rate, or intensity, can be varied.

C. ADJUSTABLE BODY JETS

Adjustable jets allow you to angle the waterflow for maximum therapeutic benefits. Direction and flow intensity can be varied on each individual jet.

D. EVORA ROTARY PULSE JETS

Patented Twin Helix Rotary Massage Jets produce a uniform air/water mixture with a unique circular bubble pattern and continuous, swirling rotary action. When targeted on tense and sore muscles they deliver a soothing deep tissue massage.

E. AIRFLOW CONTROL

Used to vary the intensity of the air massage, simply by turning the control.

F. ELECTRONIC CONTROL

Electronic control panels provide fingertip control. The Electronic control allows the heater to be turned off while the pump is still running conserving energy and enabling you to maintain a comfortable water temperature at all times.

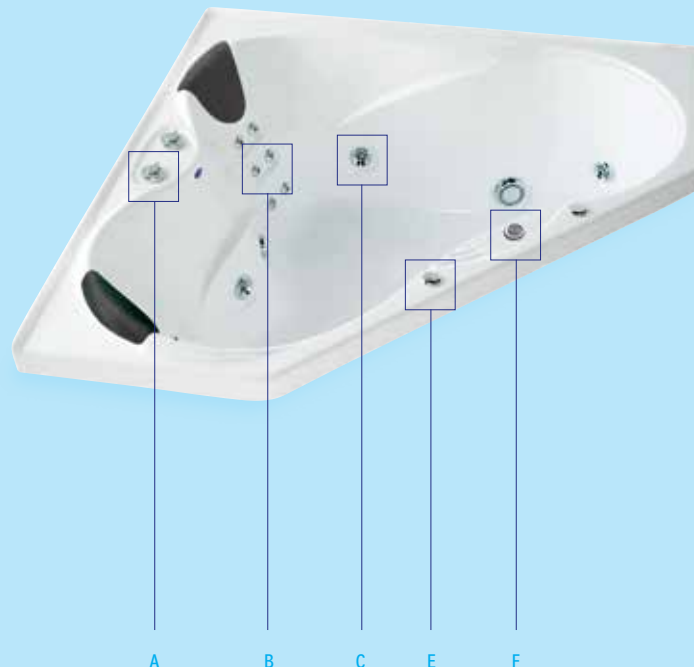

G. HIGH TEMPERATURE PROTECTION

All spas are thermostatically controlled to ensure a comfortable and safe bathing experience.

H. PATENTED BODYGUARD® VALVE

The Bodyguard® Valve features patented technology that detects blockages – eg caused by someone's hair being caught in the suction valve and instantly and automatically reduces suction so that the blockage can be removed quickly, effortlessly and above all safely.

SLIMJET™ OPTION

SlimJet

Redefine the aesthetics of your bathroom with the white SlimJet range, available as an alternative style to the conventional chrome jet option. The SlimJets are colour-matched to the bath so you can maintain a smooth and clean visual to your bathroom.

SlimJets are designed to fit snugly to the sides of the spa so you can recline comfortably without feeling the jets in your back. Its intensity can be individually adjusted with just an easy twist of the jet spout.

AirMassage™ Technology

Experience a unique bathing sensation as you immerse in style and comfort while being massaged by thousands of soothing air bubbles that invigorate the whole body.

AirMassage™ baths operate on newer technology than water jet spa baths. They use a warm air blower that generates thousands of tiny air bubbles through small air jets in the lower sides of the bath. These bubbles caress the body as they move toward the surface of the water and revitalise with a non aggressive, full-body massage. AirMassage™ baths provide a gentler massage than conventional spa baths, so perfect for older people. Also, the air jets are very small – so less obtrusive, and detract little from the attractiveness of the bath.

Air baths offer a combination of therapeutic benefits to give maximum relaxation. Water provides the feeling of weightlessness, warmth relaxes the entire body and air movement works on blood circulation. It offers a degree of relief from the pain of some physical conditions.

AirMassage™ provides an extremely affordable spa like bathing experience and it uses 70% less power than a conventional water jet spa of equivalent size, so less expensive to run. A winning combination.

AIRMASSAGE™ MINI AIR JETS

Your new Englefield AirMassage™ Bath is fitted with a set of 30-36 mini air jets that produce a series of tiny air bubbles that deliver an invigorating massaging effect to your skin. The mini air jets are colour-matched to your bath and only measured at 12mm in diameter for a clean, almost invisible look. Your AirMassage™ experience will begin with just one easy touch of the switch.

BENEFITS

The vibrating massaging bubbles manipulate soft tissues of the body that stimulate the circulation of blood flow. This activity helps the body's own repair mechanisms, thus promoting relief to minor strains and pains of the muscle. Your skin will also benefit from the invigorating effect from the movement of water of the AirMassage™ Bath.

Englefield's AirMassage™ bathing range brings you an all-over luxury at a price that easily fits into your renovating or building budget, and a style that can integrate into any bathroom design without a hassle.
