

J Class IN

The compact high-performer water dispenser

J-class water cooler is synonymous with technology and quality. J-class IN is the under-counter solution: it is easy to install, and ideal for placing underneath counters so that worktops remain free. This compact solution connects directly to the water mains, supplying chilled, still and sparkling water, or hot water. Available in two different capacities - 30 l/h and 45 l/h - J-class is a flexible water dispenser, suitable for many applications: offices, studios, homes, bars and small restaurants.

The Chilled and Sparkling Under-bench Drinking water system comes with tap, filtration system, and CO2 regulator.

Model options:

J Class IN 30 WG 30 litres/hr 7 l continuous

J-Class IN 30 WG CU (with Safepath) with added CU Safepath Permanent Biofilm Protection for maximum hygiene 30 litres/hr 7 l continuous

J-Class IN 45 WG 45 litres/hr 9 l continuous

J-Class IN 45 WG CU (with Safepath) with added CU Safepath Permanent Biofilm Protection for maximum hygiene 45 litres/hr 9 l continuous

Tap options:

Gooseneck tap:

MQ2400

The most popular option for the smaller-to-mid range chilled sparkling systems. Cost effective, attractive, with unobtrusive styling to fit into any area. Made with quality materials with an un-sprung lever mechanism, and a swivelling spout, to enable easy filling of glasses, bottles, or jugs.

Bar Tap:

MQ2401

The rugged option for those hard-working areas. With classic bar-tap styling, this will easily blend into your bar, café, or restaurant fitout. Able to deliver faster flows for quicker filling of jugs and bottles, but equally fine for filling glasses.

Drinktower:

099262

The sophisticated and stylish Drinktower option adds advanced electronic functions to the Cosmetal under-bench water dispensers. Able to easily provide large quantities of still and sparkling chilled drinking water for a wide range of situations, from offices to hospitality. The Automatic Dispensing setting makes this a popular option for conference centres or restaurants where they require repeated filling of jugs and bottles.
