

Outdoor Fabric Products Association of New Zealand

FABRIC CARE LABEL 2[®]

These instructions will maintain the appearance and extend the functional life of the fabric

- PVC Vinyl Leathercloths
- Stretch Knit Back PVC Upholstery Fabrics

PROHIBITIONS/WARNINGS

- Do not machine wash
- Do not dryclean
- Never use furniture polish, abrasive cleaners or steel wool. Regular use of cleaners containing hydrocarbons or similar additives may cause damage to the vinyl and harden the surface. Strong detergents like acetone or similar are detrimental to the vinyl surface
- Avoid exposure to excessive heat and non-colour fast dyestuffs found in some articles of clothing as they may transfer dye to the vinyl

GENERAL CARE INSTRUCTIONS

Do not remove any part for separate cleaning. Regular cleaning of head-rests, arms and seat cushions is important to remove body oils which can cause hardening of the surface. To clean, wipe with a cloth or sponge which has been moistened in warm soapy water, then dry with a soft clean cloth. The use of mild non abrasive pure soap is recommended. Stubborn grime may require gently scrubbing with a soft brush.

SPOT CLEANING / SPECIAL TREATMENTS

Treat spills and stains as soon as possible. Gently remove any soil or mop liquids from the surface. Do not scrub with a stiff brush. Apply proprietary cleaning agents strictly in accordance with instructions. Test on an inconspicuous area before use.
