# BRASS CORE

RANGE

## WHEN STYLE MEETS FUNCTION

*Proudly designed and assembled in Australia with Lockwood's trusted quality at its core, the new range of brass lever styles have been designed to integrate with the character of a building; providing aesthetic continuity throughout.*

Merging purity of form with function, the Brass Core range presents a collection of elegant lever designs that enhance the surrounding architecture.

Doors and door hardware may be the most intimate points of contact we have with a building. We are affected by the way a door looks and the way the handle feels on the door.

*Creations that reflect the style of the office. Variety in compliant door handles that connects the workspace with the user.*

Lever 133

*Educational environments can also have character. Introducing new lever styles designed to meet all compliance requirements for public institutions.*

Lever 115

Lever 118

*Welcoming designs for public spaces: Museums, venues, function rooms; opening doors to a new environment with style.*

*Clinical environments can adhere to compliance requirements whilst integrating modern interior design, to create a warm relaxing atmosphere.*

Lever 102

Presenting a new era for door hardware; where quality meets style.
