SMARTair™ Openow

So simple, so fast, so intuitive with Openow™

Send keys   **Revoke keys**   **Update keys**

Functionality for security managers Security managers instantly send, revoke or update Openow™ virtual keys directly from the TS1000 software or web browser. Virtual keys are securely deployed over-the-air to anywhere in the world.

Secure data transmission for all communications is ensured by these industry protocols:
- Encrypted https secure connection between the TS1000 software and every user's smartphone.
- AES128 with diversified keys encryption for all communications between smartphone and door devices.

TS1000 administration

SMARTair™ Openow

Multiple keys **Door opening** **No physical key**

Functionality for users

For users it's easy to take advantage of this new mobile access solution. Just download the app and receive your key immediately, regardless of where you are. It allows to hold as many virtual keys as needed. It does not matter how far you go. This feature is especially designed for professionals working in different locations.

A leap forward for convenience in every business

Openow™ is the perfect solution for facilities with people on the move or a high volume of visitors and subcontractors. It is built for businesses where third-party contractors are always on-site, and companies whose staff travel regularly to global subsidiaries.

Queues at the reception desk, temporary access for cleaning staff... The key to solving these issues in hospitals, universities, museums, offices, multinationals, co-working spaces and ministries is Openow™ from SMARTair®.
Health

- Provide doctors, nurses, medical staff, contractors, temporary personnel and service companies with virtual keys, without creating resource bottlenecks around a single issuing point.
- Users only enter specific areas to which they are granted access (entrance hall, pharmacy, laboratory or laundry) with no need to carry any physical credential but their smartphone.
- Instantly cancel virtual keys without waiting for a user to return their card, ensuring your premises remain secure.

Education

- Students and teaching staff enjoy the benefits and convenience of mobile technology, with keys on their smartphones and no need to collect them from reception or admin offices.
- Openow works with all SMARTair® devices, enabling your smartphone to open the main entrance door, the library or the teachers' offices.
- When a virtual key is revoked, it automatically disappears from the student's app, ensuring ongoing security and site integrity.

SMARTair™ Openow

Offices and businesses

- Enhance the experience: visitors receive a virtual key straight to their phone and your workplace is mobile-ready.
- Access points to areas with high footfall – such as collaborative spaces or co-working areas – no longer need a 24/7 reception desk to hand credentials to visitors.
- With Openow™, you can send virtual keys to visitors ahead of arrival, and schedule them to activate at the relevant time.

Public institutions

- For the hundreds of visitors who arrive every day and move around the site, Openow™ from SMARTair® is the mobile-ready solution you have been waiting for.
- Convenient for employees: store multiple virtual keys on your mobile phone, each with individually programmed permissions for different sites.
- Time-saving for visitors: no more queues at reception, no more waiting for physical keys or the smart-card terminal, because your mobile phone is your key.

Openow™ makes your SMARTair® access control system mobile

- SMARTair® is a powerful access control system, simple to install, configure, administer and maintain. It adapts to any size of building and perfectly integrates with your existing door security.
- And now, with the Openow™ solution from SMARTair®, you can convert your smartphone into a key. Users
- conveniently open doors with their smartphone while it provides facility managers with great flexibility in handling virtual keys.
- Our Openow™ mobile solution is suitable for both new and existing SMARTair® installations, as only few steps upgrade your site to make it mobile ready.

The system includes:

Whatever your premises and needs, SMARTair® has the right solution:

Software
The SMARTair® TS1000 administration software is intuitive and can be accessed from any device (PC, tablet or mobile phone) with a standard browser.

Credentials
Openow, the App for smartphones, is now available. Mobile solution can be combined with other existing credentials (cards, bracelets, tags) in the same installation.

Knob cylinders
For management and admin doors, knob cylinders are the right choice.

Escutcheons
Robust, slim design escutcheons, ideal to equip any type of exterior or interior door or access point (wooden doors, aluminium-profile doors, fire resistant doors and escape routes).

Wall readers
For entrance doors, car parks, lifts and common areas with high traffic flows, wall readers are the best option.
