# Iconic<sup>®</sup> Outdoor Range

Introducing our next generation outdoor platform. Designed with electricians in mind.

Integrated seals into the frame reduce the need for sealants making a clean and fast installation.

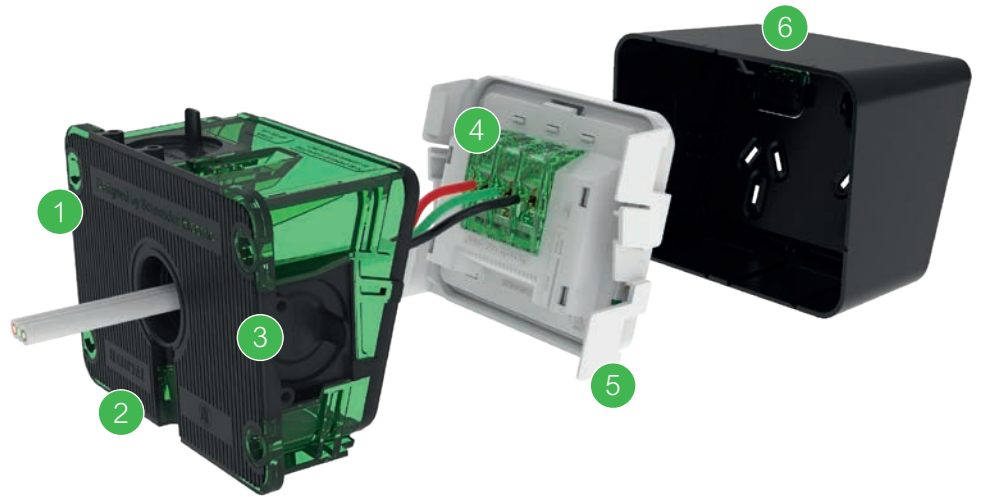

New game changing design with new aesthetics for unrivalled appearance and functionality now and in the future.

PDL Iconic Outdoor sockets have integrated sealed shutters to provide IP54 protection and keep your connection reliable.

Innovative clip-on skins reduce the need for screws during installation, making a quick and easy install every time.

- 1 Mounting holes outside the waterproof area. Requires no drilling or caps to ensure IP rating.
- 2 Full over-moulded rubber on back to prevent slipping on the wall and absorb inconsistencies in the wall surface.
- 3 All seals integrated into the frame fix onto conduits or cables reducing the need for additional sealants. Seals can be easily opened with pull tabs.
- 4 In-line terminals make installation faster and easier.
- 5 Large clips allow the grid to be attached in seconds.
- 6 A hidden press-to-release lock allowing the cover to be easily removed and replaced.

	<b>PDLO394-XW</b> Single Socket 10A 250V White.		<b>PDLO381-XW</b> Single Switch 20A_16AX 250V White.		<b>PDLO300CE-20</b> Conduit Entry Kit Diameter 20mm White.
