LEAD-FREE RAUTITAN

PRODUCT CATALOGUE NEW ZEALAND

LEAD-FREE RAUTITAN

Plumbing system for safer drinking water

Water is the most precious element to human life; an essential nutrient for our health and well-being. Everybody has the right to clean water and this is what drives REHAU's commitment to create innovative and sustainable plumbing systems that deliver safe, clean drinking water to the community. In New Zealand, the availability of clean, fresh drinking water is generally taken for granted. Although, for a number of years now, there has been a growing concern regarding the purity of our drinking water due to reports of compromised water quality in some buildings. Recent cases of elevated lead in drinking water in Christchurch and Auckland taps has resulted in more serious discussions regarding the importance of tighter regulations on plumbing materials and design. It is widely known that many components that make up the water supply networks in our homes and businesses are made from DZR brass. Yet, it is not widely understood that these brass components contain varying concentrations of lead. Lead gives brass some valuable properties for the production process including machinability and malleability making it more cost effective to produce. Nevertheless, if consumed it is extremely harmful to human health. In Germany and the USA more stringent lead content regulations have been in place to reduce the risk of lead contamination in drinking water, driving manufacturers to develop low lead or lead-free solutions.

Through REHAU's commitment to help people consume the cleanest and purest water possible REHAU ANZ has introduced the first lead-free PE-X plumbing range to New Zealand. REHAU's Lead-Free RAUTITAN consists of our renowned premium quality, high flexibility PE-Xa PN20 pipe combined with Lead-free PPSU PX polymer fittings, lead-free Gunmetal (RX+) fittings and PX polymer sleeves to create the cleanest and safest plumbing system on the planet.

PE-Xa RAUTITAN Pipe

With 50 years of experience in PE-Xa pipe production REHAU has perfected the process of creating the highest quality pipe with the ideal properties for plumbing applications. PE-Xa pipe is naturally lead free and has been specifically treated to ensure optimal flexibility, toughness and cleanliness to deliver pure, taste and odour-free water to the end user. Available in sizes from 16mm to 63mm for various applications including domestic hot and cold water, rainwater, recycled water and hydronic heating, REHAU's PE-Xa piping system is the ultimate choice for hygiene and sustainability.

PVDF PX Polymer Fittings

PX fittings are made from PVDF material, which is 100% lead-free and supremely hygienic. Available in non-threaded fittings in sizes 16-40mm, PX fittings are 5 times lighter than brass meaning you can carry more and get the job done faster. They are corrosion proof and lead-free so they do not deteriorate over time, suffer oxide build-up or leach lead into the water making them safer for the community. PVDF is the same material as the PX sleeve and has proven over many years of incident-free operations.

Gunmetal RX+ Fittings

RX+ fittings are made of a high quality low-lead bronze, also known as Red Brass or Gunmetal. They have a maximum lead content of 0.1%, exceeding the most stringent international standard for low-lead drinking water systems.

PX Polymer Sleeves

While compression sleeves are never in contact with water and therefore not covered by international low-lead regulation PVDF PX sleeves are 100% lead-free. They are available in sizes 16 to 40mm for use with REHAU water, gas and heating piping systems. They are lightweight, faster to install and completely secure making them the ideal material for compression sleeve jointed applications.

U-bend Fittings

Stagnant water in pipes (dead-legs) is known to facilitate the reproduction of bacteria and Legionella growth, which can cause health problems, commonly known as Legionnaires' disease. While guidelines exist in the New Zealand Plumbing Code to help minimise the risks, it can often be quite difficult to design a system that eliminates dead legs. REHAU's Gunmetal U-bend fittings are a unique concept purposely made to tackle this problem; minimizing dead-legs and allowing water to flow through plumbing fixtures even if they are not being used frequently. The U-bends reduce the risk of legionella growth facilitating the delivery of safer and cleaner water for the community.

With Lead-Free PE-X piping system now available in New Zealand the question arises, status quo or Lead-Free RAUTITAN? The choice is yours.

PIPES

Lead-Free RAUTITAN is suitable for Platinum and Red RAUTITAN pipe in sizes 16-40mm

RAUTITAN platinum for drinking water

REHAU Article	Size	m/Coil	m/Length	Package (m) Coil	Package (m) Length

SLEEVES

PVDF PX Sleeves

PX sleeves are made of solvent resistant PVDF material

RAUTITAN PX compression sleeve - polymer

REHAU Article	Size (mm)	Material	Package (pcs)
160001	16	PVDF	100
160002	20	PVDF	100
160003	25	PVDF	100
160004	32	PVDF	50
160005	40	PVDF	25

FITTINGS

NON-THREADED FITTINGS

Non-threaded fittings are compression sleeve fittings that join PE-Xa pipes. Lead-Free RAUTITAN non-threaded fittings are made from PPSU (PX) and Gunmetal (RX+) material.

RAUTITAN PX no.1 straight coupling

REHAU Article	Size (mm)	Material	Package (pcs) Bag/Box

456388	20	Gunmetal	10/100

THREADED FITTINGS

Threaded fittings are metallic fittings with a thread on them that allows connection with third party components or appliances. Lead-Free RAUTITAN threaded fittings are made from Gunmetal (RX+) material.

"R" = tapered male thread

"Rp" = female thread

"G" = parallel male thread (ie No.19BP's and new U-bends)

LEAD-FREE no.2 straight connector - female

REHAU Article	Size (mm)	Material	Package (pcs) Bag/Box
