FSC Certified
PEFC Certified.

Dimensions:

Thickness	Length x Width
12mm	2440 x 1220mm

Colour Consistency:

With natural veneers it is not possible to guarantee an absolute consistency in grain and colour. A slight grain and colour difference between sheets of plywood is not considered a defect.

Panels exposed to direct sunlight may undergo changes from the original colour.

Handling and Storage:

Plywood is a natural product that can be affected by changes in ambient weather conditions, causing previously flat sheets to bow or twist. All precautions are taken to minimise this effect, however once the plywood has left our warehouse we cannot guarantee sheets to remain flat. This is particularly important where free standing kitchen/ cabinet doors are concerned.
