

## Carcass Grade Ply

Mixed light-hardwood plywood finished on both sides with a 0.7mm thick HPL. The perfect panel for the construction of kitchen carcasses and other joinery applications in so-called "wet-areas": bathrooms and laundries.

For high-end applications where panel surface and edge detail is a distinct feature we recommend using Plytech Futura HPL.

### OPTIONS

Available with a black or white HPL on both faces..

### DIMENSIONS

16mm 2440 x 1220mm, 18mm 2440 x 1220mm.

### SCOPE OF USE

Carcass construction.

### LIMITATIONS ON USE

For interior use only.

### TECHNICAL SPECIFICATIONS

Standard – Marine Bonded Exterior

Raw Material – Mixed Light-Hardwood

Density – average 560kg/m<sup>3</sup>

Glue Bond – EN 314-2: Class 2 Covered Exterior

Glue Formaldehyde Emissions – E1\* (AS/NZS 2098.11).

### HANDLING AND STORAGE

Plywood is a natural product that can be affected by changes in ambient weather conditions, causing previously flat sheets to bow or twist. All precautions are taken to minimise this effect, however once the plywood has left our warehouse we cannot guarantee sheets to remain flat.

Avoid leaning sheets against walls. Store sheets where construction traffic and construction activity will not damage sheets. Keep the surface free of contaminants such as dust, oil and adhesives that will affect the surface finishes.

The storage area should be protected from sun, rain and wind to minimise rapid changes in temperature and humidity. Treat sheets as a finished product and avoid dragging sheets across other surfaces.

Panels are always to be handled by two people.
