

NOTE: Where a suspended ceiling is present the air space above the suspended ceiling has been assumed to be 100mm - 1200mm deep. For large ceiling space the heatflow in R-value should be reduced by approximately R0.5.

NOTE: WHERE JOINS ARE APPLICABLE, APPLY 150mm OVERLAP (TAPED OR UNTAPED) OR BUTT JOIN AND TAPE. APPLICATION ROLL-OUT FOR THIS DESIGN PROFILE IS HORIZONTAL.

DESIGN No. C2
 PRECAST CONCRETE WALL - INTERNAL FRAME
 Metal Roof
