

The Gauzy Advantage

Gauzy is the industry leader in the development and manufacturing of premium LCG® technologies used to make smart glass, and is the only material science company working with both SPD and PDLC. With dedicated chemistry and hardware laboratories, and proprietary production lines, Gauzy products are created with a commitment to innovation and precision for unparalleled performance and durability.

Designed to fit customers' requirements, Gauzy's patented smart glass films, controllers, quality verification tools, and certified network define the standard of excellence. Selecting Gauzy LCG® technologies ensures the highest quality smart glass and experience for users.

Leading Performance

- Lowest haze industry wide
- Switching in 0.1 seconds
- Low voltage power consumption
- Optimized for interior and exterior applications
- Lasts over 18 million+ on/off cycles
- All day transparency with patented controllers
- Fully customized dimensions, shapes, patterns

Innovative Products

- The only smart glass controller in the market that prevents burnout, film failures, and allows glass to be kept on 24/7
- Patented technologies utilized in full product ecosystem
- Continuously optimized to provide cutting edge products
- Manufactured in ISO 9001 compliant facilities worldwide
- CE and UL certified hardware
