

Product

Name	Charisma Range
Identifiers	Charisma Black, Charisma Blue, Charisma Charcoal, Charisma Revival Green, Charisma Slate Grey, Charisma White

Description

More of our clients are requesting matte-surfaced Acrylic panels, and we have now sourced a super high-quality Acrylic-Birch product from Europe. These premium matte hardcoat acrylic panels are anti-fingerprint and have anti-bacterial properties. Their scratch and abrasion resistance is significantly higher than other standard matt surfaces. Available in six colours to suit your upcoming cabinetry project.

New! Charisma panels are now available on an E0 MDF core with six colours to choose from, including the new and celebrated Revival Green. These panels come two sided and have edge tapes to match. A more cost-effective solution with all the added benefits of Charisma for your next project.

The Charisma Birch Panels are only available on one face except for the Black, which is also available on two faces. All Charisma MDF Panels are available on two faces only. Laser & ABS matching edge tape available.

Technical Specs

Available Sizes	2400 x 1220
Available Thickness	17.5mm

Finish	Smooth Matte (Anti-fingerprint & Stain-resistant)
Core	European Birch BB multiply core, WBP EN34-2 Class 3
Origin	Austria
Environment	Sustainable Plantation

Uses

- Kitchen Cabinetry
- Wall Panelling
- Commercial Cabinetry
- Commercial and hospitality furniture

Limitations of Use

Not for exposed external use. Not for use in fire surrounding applications. Not to be used in areas directly exposed to water.

Handling & Application/ Plywood is a natural product that can be affected by changes in weather conditions: moisture and temperature. Temperature variation may cause internal stresses causing previously flat sheets to bow. Precautions are taken to minimize this effect. However, once the plywood has left our warehouse we cannot guarantee sheets to remain flat unless fastened. This is particularly important where free standing kitchen/cabinet doors are concerned. When storing panels, stack with enough support to prevent sagging. Cover the pallet to protect top and edges.
