

EFA-SRT® CR C: The sealing and compact door

With the EFA-SRT® CR C EFAFLEX has developed a door type specifically in response to the needs of the cosmetics and pharmaceutical industries, where effective sealing and space requirements are critical. The door model is characterized by its compact design, reduced headroom requirements and slim supporting legs. Air loss is reduced to a minimum even with strong pressure on the door curtain.

Top cover

- With easy access for service and maintenance
- Available with either 15° inclination or straight to the ceiling, reducing particle settlement

Control EFA-TRONIC®

- Fully integrated within the top cover
- With frequency converter
