TopFix 2T-90™

TopFix 2T-90™

The CS TopFix fits into standard 90mm framing and is easier to install and finish than similar products on the market as timber head jambs are not required. This product suits any wardrobe situation where space is at a premium.

This system uses a discreet floor guide hidden in the door overlap, so there are no unsightly floor tracks through the door opening.

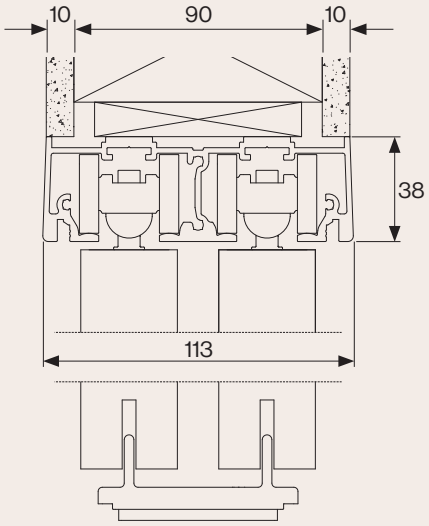

Features

- Standard timber doors can be used, ensuring all your internal doors match.
- Vertical jambs can be supplied as optional extras.
- Suits standard 35-38mm thick doors up to 120kg.
- Track and clip-in pelmet are pre-treated, ready for painting on site.
- Available with CS SmartMount System.
