Cavity Sliders™

CaviSlider

Accessible Cavity Slider

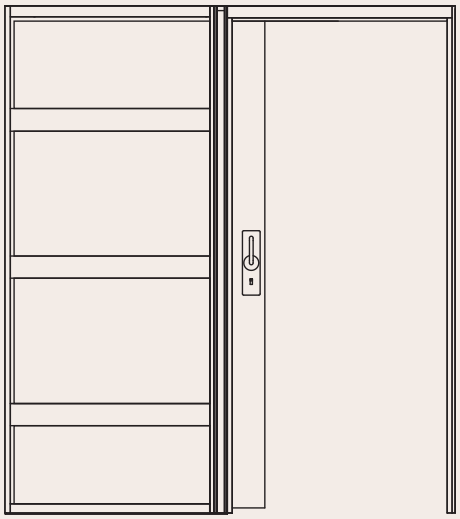

Accessible Cavity Slider

Features

The CS Accessible cavity slider system has been developed to provide council compliant access to toilets for the disabled. It is also specified when handles or hardware that protrudes from the face of the door are required.

The cavity pocket is cut short by 100mm, enabling the door to protrude 100mm.

- One toilet can be used by everybody
- Supplied fully assembled, ready for on-site installation
- Fully compliant when a 910mm wide door is used. For increased clear walk-through, a door leaf width of 1050mm may be more suitable
- Combine with a CL100 LaviLock or CL400 ADA Magnetic Privacy handle for a complete accessible solution

How to Specify (example)

Product	Accessible (Easy Open) Cavity Slider
Location	Toilet D801
Door leaf dimensions	2100mm x 1050mm
Door type	Flush Solid Core
