Who we are

Innovation has been at the heart of what we do at Boundaryline Fencing Systems since the company was founded in Invercargill, with a range of timber Post&Rail fencing many years ago. We quickly found there were people throughout the New Zealand construction industry that liked our way of doing things, so our range of fencing systems grew quickly to meet the requirements of the market.

With the widest range of fencing systems available on the New Zealand market and located in Auckland, Christchurch, and Invercargill – we have the products, service and attitude to make fencing easy for you.

Our promise

We're a customer focused team, dedicated to making it easy for anyone in New Zealand to get the fence they need. We listen to what you tell us and work with you to reach the best solution for your project.

Our values

Right thing, right now

- Integrity, fairness & respect is non-negotiable
- Act professionally & be authentic
- Be a role model; for each other, & the brand

Together we win

- One team; whatever your role, wherever you are
- Every interaction must be a win-win
- Celebrate the successes and learn from the losses

Dig deep when it matters

- We're diligent & dependable
- Prioritise; focus on what's important now
- Go the extra mile, do what needs to be done

Seize the opportunity

- Better never stops; challenge the status quo
- Take action; time waits for no one
- There's a solution to every problem, & an opportunity in every challenge

DURAPANEL

Smart fencing for homes, pools and schools

Boundaryline DuraPanel tubular metal fencing offers a wide range of options for pool fencing, landscape fencing, schools and childcare centres. With high quality components and a sleek, cohesive design, DuraPanel complies with all New Zealand pool fencing regulations to keep children safe and to meet council requirements.

Our DuraPanel aluminium range is designed for durability and offers great looking property enhancement and protection at a cost effective price.

The DuraPanel range of custom made fencing offers a wide variety of styles and colours to meet specific design requirements for any project.

All DuraPanel fencing is designed to be simple and quick to install, with modular components and welded panels.

Producer statements are available for pool fencing, balustrade, and retaining wall fencing compliance.

Safety Fencing

F4 Safety From Falling compliant

For some applications extra strength is required. In our DuraPanel range we have design engineered the Delta 35 and Titan safety fencing with extra reinforcement to comply with F4 Safety From Falling Compliance, when installed to manufacturers specifications. It is New Zealand's first aluminium safety fence that can be installed at 2400mm centres while meeting the NZBC F4 specification requirements.

SENTRY**PANEL**

SentryPanel Spear Top

New Zealand's premium security fencing

Boundaryline SentryPanel is designed to provide superior protection for your investment while looking great at the same time.

The Spear Top option has sharply spiked bars to deter intruders, and Rod Top provides the same security without looking too unfriendly. Both styles have a long anti-climb gap, making it a virtually unscalable barrier.

SentryPanel is constructed from heavy wall aluminium componentry, welded for strength and powder coated for long term durability. The modular design and comparatively light panel weight makes installation quick and easy.

SentryPanel is a smart, cost effective security fencing solution for all types of commercial property.

Security Gate Solutions

Many commercial and industrial properties require a high level of security to limit unauthorised access.

Boundaryline works with construction companies, property owners and designers all over New Zealand to deliver reliable security gate solutions for all kinds of applications.

SentryPanel gates are manufactured using standard in stock componentry to achieve a quick, cost effective solution that will perform to perfection for the long term.

Swinging gates
Swinging gates are the most cost effective option when there is enough opening space or when the entrance way is not level. They can be automated if required but are usually used when the gates are not opened frequently

Tracked sliding gates
Where traffic is relatively light but a sliding gate is required, a tracked gate provides a cost effective solution. The ground track is very low profile and this type can be used with or without an automated opener

Cantilever sliding gates
Boundaryline has had extensive experience in designing and building cantilevered sliding gates. With no ground track required, a cantilevered gate is ideal for industrial situations that have heavy traffic or where the entrance way is not level

Custom designs
We can supply custom made gates to meet your design requirements

For Flat Top and School Panel fencing to comply with **F4** and **F9 NZBC** requirements, all product must be installed as per Boundaryline's PS1, available at boundaryline.co.nz/technical-resources

SMART**WALL**

Blending seamlessly with natural surroundings

Create beautiful natural boundaries to complement your new landscape with Boundaryline's smart alternative for timber fencing.

SmartWall features steel posts and rails with CLT (Cross Laminated Timber) palings to prevent twisting and warping over time, ensuring you have a premium looking boundary solution for years to come.

With CLT palings and the same-both-sides look, SmartWall creates a tidy, elegant finish with ultimate stability for every project.

The superior acoustic performance of SmartWall makes it the ideal choice for residential and commercial projects including child care centres and rest homes where noise minimisation is a requirement.

The modular construction makes SmartWall one of the easiest and fastest fences to install, saving you time and money.

Acoustic Properties

The acoustic properties of SmartWall makes it the ideal choice for medium density housing, childcare centres and homes located near busy roads. Visit boundaryline.co.nz to download SmartWall acoustic performance report.

CLT palings

Cross Laminated Timber (CLT) palings are a cross laminated timber plank developed using high performance European glue lamination technology.

The gluing of three layers of timber, with the middle layer the opposite orientation to the outer layers, provides maximum stability and strength, reducing the twisting and warping that is common in traditional timber fencing.

Mini CLT planks are treated using the environmentally preferable MicroPro timber treatment, which is GreenGuard certified for use in play areas and child care centres for children of all ages.

PICKETPANEL

Modern take on traditional fencing

PicketPanel embraces the nostalgia of the traditional picket fence, while providing a refined architectural range of contemporary options suited to the modern environment and today's busy lifestyle.

A durable interpretation of the symbolic family home boundary, blending the romance of days gone by with design and construction fit for the next generation.

Designed in consultation with industry partners to meet the needs of New Zealand's increase in medium density housing developments.

Raking Panels

The unique design of PicketPanel allows for panels to be installed on any angle up to 35 degrees to suit ground contours. This allows panels to be installed on undulating & sloping ground while meeting the maximum gap requirements for fencing installed in F4 (Fall from Height) and F9 (Pool Fencing) situations.

COLOURPANEL

Setting the standard in residential fencing

For great looking, low maintenance privacy fencing, Boundaryline ColourPanel sets the standard throughout New Zealand. No more twisted or rotten timber fences.

ColourPanel is truly a same-both-sides fence, which makes it ideal for urban properties since both neighbours get the 'good' side of the fence.

ColourPanel is made from a prefinished steel commonly used for roofing which is durable and stable. It will not warp and twist like a traditional timber fence, even when a dark colour is used in any climate.

Installation is very quick and simple, with modular, colour matched components. Even DIY customers will be impressed with how easy it is to get the job done!

To maintain the same look as the day it was installed, all ColourPanel needs is the occasional wash down. No painting or staining required.

COLOURSLAT

ColourSlat Steel

Smart integrated privacy screening

Boundaryline ColourSlat is the ideal choice for screening outdoor living areas and courtyards, as it allows natural light penetration while providing privacy.

For long term durability and a great appearance, choose the standard steel ColourSlat. This is a complete system using prefinished steel components and will not fade, warp or twist.

If you are looking for an alternative to an all steel fence, ColourSlat with timber slats will meet your requirements. The timber slats are manufactured from high grade Radiata Pine and can be stained to the colour of your choice.

ColourSlat is designed to seamlessly integrate with ColourPanel fencing, or it can be installed as a stand-alone fencing system.

ASCOT **GATES**

Smart and easy pedestrian gates

Ascot Gates are manufactured from New Zealand grown Radiata Pine, pressure treated H3 for maximum durability and constructed using traditional mortise and tenon methodology to ensure robustness and reliability.

Available in four popular designs, these robust and reliable timber gates will complement any home. They are available in both standard and custom heights and widths to suit specific project requirements.

Regent

Oxford

Oxford

Pedestrian

ELITEWALL

New Zealand's premium panel fence

The EliteWall system is the preferred choice for property owners who require a cost effective solid panel fence that provides style, function and privacy.

EliteWall is New Zealand's most advanced line of modular panel fencing. Made with lightweight components, yet structurally strong and simple to install.

Superior acoustic performance makes EliteWall a popular option for rest homes and motels, or any property located near busy roads.

EliteWall is the ideal alternative to concrete or block walls at a fraction of the cost and is suitable for fencing in earthquake zones.

A complete range of infill options gives the flexibility to choose any combination of panels between posts; solid panels, DuraPanel infill, Green Screen infill and aluminium slats or louvres. EliteWall has an extensive range of different design possibilities.

ELITE**WALL**
Infill Options

Louvres

Aluminium louvre infills provide privacy and security with an upmarket, contrasting design aesthetic.
Aluminium louvres are supplied with a powder coated finish and can be colour matched to any standard New Zealand colour.
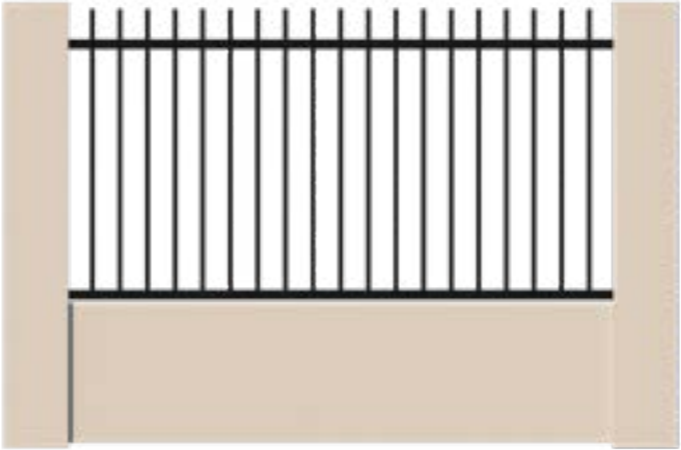

DuraPanel Infill

DuraPanel infill option is great solution where sections of fenceline require a more open permeability. DuraPanel is supplied standard in black powder coated finish, but also can be colour matched to any standard New Zealand colour.

Slats

Aluminium slats provide an open feel, while maintaining a level of privacy for the property owner.
Aluminium slats are supplied in a powder coated finish and can be colour matched to any standard New Zealand colour.

Green Screen Infill

Green Screen infill option provides a unique mesh design element to encourage the growth of climbers and plants.

GREEN SCREEN

Green Screen

Green fencing made easy

Green Screen

Green Screen is a unique mesh fence panel that is designed to support climbers and plants. Green Screen provides an initial security and barrier as a modular fence system, while the unique integrated mesh design encourages growth of climbers and provides maximum support for the most delicate plants.

Over time the fence will form a dense and uniform green wall that blends in with nature and enhances the landscape. Green Screen is a practical and great looking landscape feature for any property.

Green Screen is a component based system and easy to install between the standard slim line posts, or any column design of your choice.

POST&RAIL

New Zealand's versatile fence

From lifestyle blocks to large farms, entrance ways to subdivision projects, Boundaryline's Post&Rail is used all over New Zealand and in a variety applications.

Post&Rail is a cost effective and easy way to enhance the appearance of your property.

The unique Boundaryline straight through mortise allows the rails to interlock in the post without the use of any hardware. This makes for a strong fence that is simple to install, even on sloping ground and with curved lines.

We use specially selected premium grade timber to ensure our Post&Rail fencing looks great for years to come.

With a wide range of options and the ability to supply custom made systems, we can provide a Post&Rail solution to suit your design requirements.

LIFESTYLE TIMBER GATES

Boundaryline's Lifestyle Timber Gates stand out from the crowd. Made in a traditional style to match our Post&Rail fencing, these are not your average farm gates.

With a focus on manufacturing quality, these classic timber gates have thicker rails for added strength, dressed timber for a sleek finish and supplied with black powder coated hardware and hinges to complete the look.

TIMBER **BOLLARDS**

Boundaryline bollards are the ideal cost effective way to block vehicle access to parks, reserves and walkways, while allowing easy entry for pedestrians and cyclists.

Boundaryline bollards are made to our standard designs or to your own specification.

We use premium landscape grade timbers: Radiata Pine and Macrocarpa. Or, if required, a selection of sustainable hardwoods are available.

We manufacture custom designed bollards including metalwork features and signage if required. Speak to us to make your ideas become reality.

CUSTOM ENTRANCE GATES

Enhance and secure your property

Gates and entrance ways are an important component of landscape design and are essential to secure and enhance any property.

Boundaryline can provide custom gates for all kinds of projects and many of these are taken care of by the Heritage team.

Heritage Gates & Fences is an associate brand of Boundaryline, with over 25 years of experience in manufacturing custom gate and fence solutions.

Heritage Gates & Fences started out manufacturing wooden gates but now focus on producing traditional-style gates in aluminium to achieve the same look but with low maintenance and long term durability.

The range also includes open-style gates and contemporary designs along with the ability to produce gates to a custom design.
