

# Radiators

## Responsive and flexible heating

Warm water radiator central heating is the best way to heat both new and existing Kiwi homes. Not only does it deliver much higher levels of comfort, it responds the best to our changeable weather and busy lifestyles giving us exactly what we need when we want it.

Radiators provide a responsive and flexible heating option for both new and existing homes. They heat up and cool down quickly, so are ideally suited to New Zealand's changeable weather conditions and the typically busy lifestyles of New Zealanders.

## Quality European Radiators

Central Heating New Zealand stocks high quality European DeLonghi and Korado radiator ranges, as well as designer radiators made by DeLonghi, Koratherm, Radiatori, Arroll, Ridea and Scirocco. These eye-catching radiators combine thermal efficiency and aesthetics to complement interior design or act as a focal point.

- Radiant heat with no forced air movement
- Quick response time (around 10 minutes to warm up)
- Variety of styles; endless colour options
- Operates at safe temperatures, between 60°C and 75°C
- Can be turned off individually or as a system

## Available Models

### DeLonghi Steel Panels Radiators

Central Heating New Zealand stocks DeLonghi's Steel Panel Radiators as standard. They are available in two common types: Type 21, which is 66mm thick; and Type 22, which is 100mm thick. They are available in sizes ranging from 400 to 2300mm wide and 300 to 900mm high. These types and sizes affect the amount of heat that the radiator puts out.

### Korado Line Radiators

The Korado Line Radiators are a high-quality, European manufactured radiator that comes with a 25-year warranty and 8-ports for connection flexibility. The Korado's slim profile, low water content and high output along with the contemporary design suits both commercial and modern residential projects equally well, and can be custom coloured to suit your decor. The Korado is available in heights ranging from 400 to 600mm and lengths from 400 to 1,800mm. The Korado is available with the 21, and 22 style panel configurations and its output ranges from 277 to 3,715W.

### Designer Radiator Range

Central Heating New Zealand also stocks designer radiator models in a range of modern and traditional styles. Many people highlight these as decor features in their home because of their unique visual appeal, although their output is usually somewhat lower than models in the standard range. It also provides a nice stylistic contrast in contemporary settings. The designer range and is available by indent order only.

### Radiator System Design Considerations

Central Heating New Zealand designs each radiator system to be the most efficient as possible given your home's layout and your heating needs. To do this, there are important factors to keep in mind when designing each radiator central heating system.

These factors include positioning the radiator in the coldest part of the room, where it is most effective (under window for example). Barriers should be avoided that prevent the heat like drapes and bed headboards, and a radiator should be included in every room and on landings of multi-storey homes. When designed correctly, often a system will be capable of achieving a higher than recommended energy output, even at extremely low outside temperatures. Our system design engineers will determine the radiator types and sizes required to heat your home. To extend the life of your system and prevent corrosion, a Fernox inhibitor should be use for protection.

Product Code	Style	Order
DLP21	DeLonghi Radiator Type 21	Stock
DLP22	DeLonghi Radiator Type 22	Stock
