

Antimicrobial Door Sealing Solutions

The threat of bacterial infection exists in all environments, but particularly in 'high traffic' commercial buildings.

Dangerous bacteria live on all common surfaces, including doors, door hardware and door seals. These can be easily spread by simple human contact.

To assist in suppressing the growth & spread of these bacteria, Kilargo has incorporated antimicrobial technology into the manufacture of its range of silicone door seals. Our innovative range of antimicrobial silicone gaskets provide outstanding performance with unbeatable hygiene, eliminating up to 99.99% of bacteria.

Manufactured with in-built SteriTouch® protection, these antimicrobial seals are designed for 'clean room' environments and buildings that demand superior infection control, including:

- hospitals, medical centres and nursing homes
- laboratories and testing facilities
- childcare centres and schools
- food-handling areas.

Like all Kilargo products, our SteriTouch® range is professionally manufactured to exacting standards – providing exceptional solutions for containing sound, limiting the spread of smoke, improving energy efficiency and preventing weather infiltration. Along with incredible bacteria resistance, they're the perfect choice for the most hygienic buildings.

Our products

We develop the right solution from a full, integrated product range including:

- Kilargo Architectural Seals
- Fire & Smoke Seals
- Fire Door Upgrade Seals
- Fire Door Air Transfer Grilles
- Intumescent Fire Dampers

Antimicrobial Seals can be manufactured for any Kilargo product with a silicone gasket.
