

Double Hung Windows

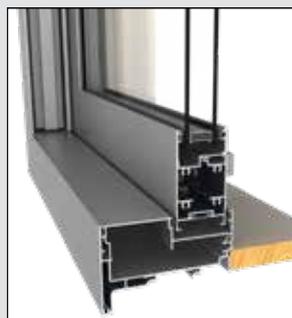

Window rails (adjoining).

Key Features

- For residential and commercial use
- A counter-balanced, double hung system where both panels move together
- A good option for non-projecting ventilation
- In fully open position with both sashes adjoining each other half the window area is open

Window head.

Window sill.

Opening handle.

Specifications

Dimensions

Weight restriction per panel 50kg. Recommended aspect ratio 2:1.

Maximum Glass Thickness

Double glazing to a maximum of 30mm.

Thermal Values

U-value 6.569 **R-value** 0.152

Performance

Tested to Extra High Wind Zone.

Design Considerations

- A good option where non-projecting windows are required
- Consider the ease of reaching to the window catch if the sliding panel is placed beyond a bench
- Opening gap at sill may need to be restricted in high window situations
- Double hung windows will generally be appropriate in single banks because of the large width of coupling bars
- Work well with insect screens.
