

SPAN TABLES

Date 01.01.17 Scale NTS

Extrusion: K76301/K7V321
Description: Light Mullion/Transom

Centres	Spans for each wind zone				
	Low	Medium	High	Very High	Extra High
500	2551	2214	1867	1647	1502
600	2339	2033	1719	1520	1389
800	2056	1796	1529	1362	1253
900	1959	1716	1469	1315	1215
1100	1823	1610	1396	1264	1179
1200	1777	1577	1377	1255	1176
1400	1717	1541	1366	1254	1176
1500	1700	1535	1366	1254	1176
1700	1689	1534	1366	1254	1176
1800	1689	1534	1366	1254	1176
2000	1689	1534	1366	1254	1176

Spans are the maximum calculated allowable, based on NZS4211:2008, which requires that the member deflection at serviceability wind pressure (SWP) shall not exceed 1/200 of the span. Spans shown with an asterisk will meet code requirements but will have a max deflection greater than 18mm. Hardware and componentry may further restrict the spans. For advice contact APL Technical Advisory Service.
