

dbGrid™

Acoustic Ceiling Panel Series

Product overview

dbGrid™ BelowGrid™ range of high-performance acoustic ceiling panels help to create a modern, open look, and improve the audible clarity in large open spaces.

OpenGrid™ is a light-weight, high-performing, and attractive alternative to metal ceilings.

Designed and manufactured here in New Zealand, OpenGrid™ visually masks ceiling plenum spaces, whilst allowing for open air circulation and above grid lighting.

Additional baffles can be backloaded or provided pre-assembled with the OpenGrid™ for aesthetic contrast, a visual barrier between spaces, and enhanced sound absorption properties.

Available either in standard colours and sizes, or with custom colour and size combination.

Applications

Ceiling:
Corporate interiors, Showrooms, Speciality retail, Foyers & Lift lobbies, Retro-fit to existing grid or for new builds.

Benefits

Precise installation

dbGrid™ OpenGrid™ series comes in three standard panel sizes to perfectly fit standard ceiling grids

Better spaces

Improved acoustics: Audibly reduces reverberation time

Visual impact: Three standard grid sizes, and alternative design finish options, and a variety of available material colours offering up to 80% light reflectance

Future proofing

Ensures 100% plenum space access

Durable panel construction with high impact resistance, easy to maintain or replace

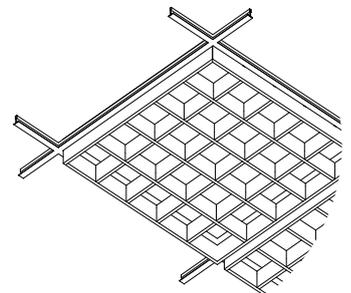

CUSTOMISATIONS

Custom prints

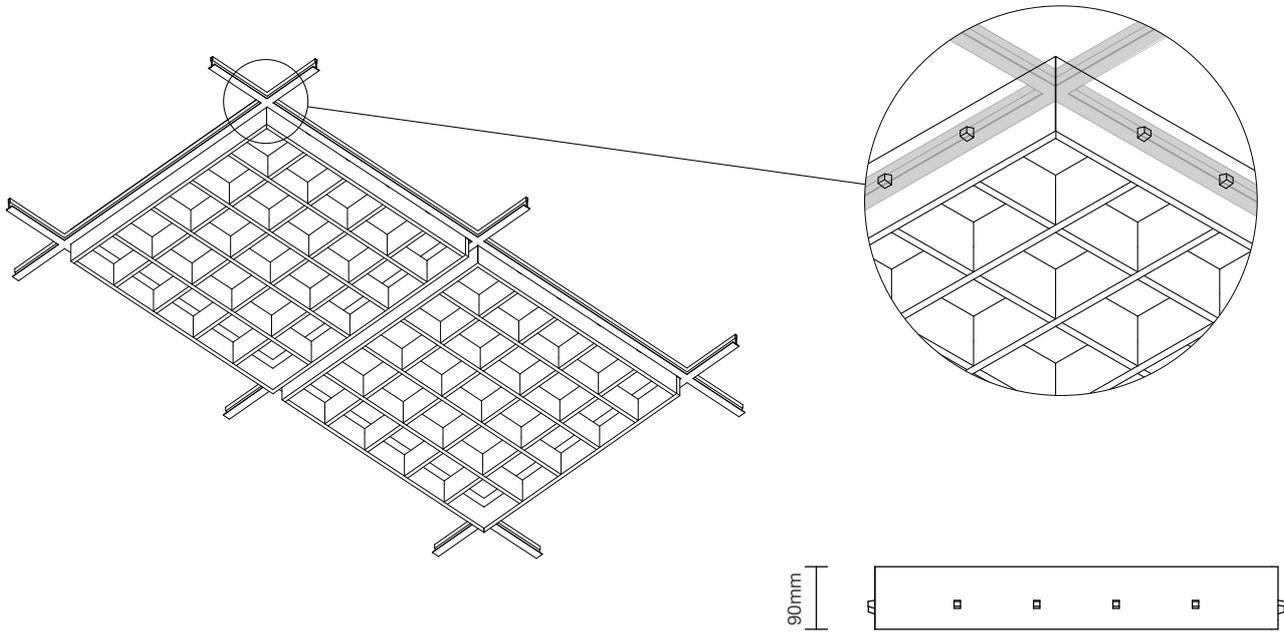

CNC cut
