

## Manufacturer's Certificate of Compliance – VOC Emissions

**Certificate:** GLP1100

**Company:** modulyss NV

### **Related Products**

modulyss® tufted carpet tiles, FR, Bitumen backed, predyed nylon (all items)

PRODUCT NAMES		
Alternative100	First Absolute	Reverse100
Centennium	First Lines	Round-up
Color&	First Stripes	Shine-up
Connexion	First Waves	Strepqes C
Converse100	In Groove	Strepqes L
Eco100 L	Line-up	
Eco100 C	Millennium	
First	Minimum100	

The actual test sample was provided by modulyss®.

The results are compliant with VOC emission requirements for use in an office environment as defined in the CA DHS Standard Practice. Additionally, the testing requirements are met to qualify the product as a low-emitting carpet for the CRI Green Label Plus program and for USGB LEED for Commercial Interiors and for New Construction and Major Renovation.

Based on the single test that was performed and assuming that the products mentioned above will perform similarly (same type of yarn and same production process), it can be deduced that all of the listed products will meet the VOC emission requirements as defined in the California Department of Health Services Standard Practice (also known as chamber testing portion of CA 01350).

ALTERNATIVE100

# PRODIS-GUT Certificate

The article mentioned meets the test criteria of  
Gemeinschaft umweltfreundlicher Teppichböden e.V.

## *Short description of the textile floor covering*

Type of production: pile carpet acc. EN 1307 - tufted

Type of surface: cut/loop cut pile like - patterned  
100% PA6

Type of backing: heavy backing Bitumen based - with textile bottom - reinforced - contains recycled material

## *Harmful substances*

The bans on use and thresholds, if applicable, in particular for SVHCs, carriers, azo dyes, allergenic and carcinogenic dyes, heavy metals chlorophenols (e.g. PCP), biocidal substances, phthalates and other softeners, halogenised flame retardants and Sb<sub>2</sub>O<sub>3</sub> as well as inorganic fibres specified in the GUT criteria have been met.

## *Formaldehyde*

The ban on the use of adjuvants containing or splitting off formaldehyde have been met.

The formaldehyde emissions are < 10 g/m<sup>3</sup>.

## *VOC emissions*

Threshold in µg/m <sup>3</sup>	3 days	28 days
TVOCl (C-C) :	250	100
VOC without NIK :	100	50
SVOC (C-C) :	30	30
R-value:	1,0	1
HCHO:	10	4
carcinogens:	not detectable	
benzene:	not detectable	

The limit values for VOC emissions indicated alongside, determined in accordance with the test chamber process (ISO 16000-6 or EN 10580), have been met. The test was made 3 days, or, where required, 28 days after placement into the chamber.

The evaluation of the emissions and the calculation of the R value were based on the then current LCI list of the AgBB.

## *Odour*

The product has passed the odour test with at least the grade 3.

A slight odour of low intensity is permissible in new merchandise.

## *Shares of recycled materials*

The requirements regarding the content of contaminants and the emission behaviour apply unrestrictedly also to products whose manufacture included the use of recycled materials. The use of recycled raw materials (e.g. pile fibres) must be indicated when the manufacturer registers the article.

For a complete list of all limit values and test criteria see

## modulyss Declaration REACH

Cher client,

Comme vous le savez sans aucun doute, le règlement REACH 19/07/2006 est entré en vigueur le 1<sup>er</sup> juin 2007. REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) a un impact sur toutes les industries. L'objectif de REACH est l'augmentation des connaissances sur les substances chimiques et les risques liés à leur emploi. L'administration européenne prévoit l'implémentation graduelle des mesures REACH dans le courant des prochains 11 ans.

Par cette déclaration nous désirons vous informer sur la position de modulyss NV concernant la règle REACH. Toutes les mesures ont été mises en place pour assurer la conformité au REACH. Nous poursuivons nos efforts pour suivre les développements ultérieurs dans le cadre du règlement REACH et d'assurer la continuation de notre conformité.

modulyss NV est un utilisateur “en aval” de “substances” et de “préparations” (produits chimiques), un producteur. Afin de pouvoir jouer notre rôle, nous avons entamé les actions suivantes:

En tant qu'utilisateur en aval de produits chimiques, nous ne sommes pas responsables pour le (pré)enregistrement de ces produits chimiques, ni pour l'analyse des risques. Cependant nous désirons informer nos fournisseurs des applications dans lesquelles nous utilisons leurs produits (emploi identifié). C'est la raison pour laquelle nous collaborons étroitement avec nos fournisseurs afin de suivre leurs progressions et mesures concernant la conformité au REACH. Nous avons également inventorié nos colorants/produits chimiques afin de réagir rapidement à chaque changement dans la chaîne des produits.

Nos produits sont des “articles” et dès lors non soumis à l'obligation d'enregistrement, excepté dans le cas d'une libération intentionnelle de substances chimiques (non compris dans notre gamme de produits). Deuxièmement, l'Agence Européenne de produits Chimiques (ECHA) publiera régulièrement une liste de substances très précaires (SVHC) sur la liste des Candidat ([http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp)).

Toute communication requise sera liée de manière unique vers cette liste officielle. Chaque fois qu'un de nos articles (produits textiles) contient une telle substance, excédant les 0.1% (m/m), nous informerons nos clients de ces produits chimiques.

De plus, modulyss NV cherchera activement une solution alternative pour ces substances utilisées sur la Liste des Candidats. De plus, nos produits textiles répondent à toutes les restrictions comme mentionnées à l'annexe XVII du règlement REACH). Sur base de nos propres connaissances actuelles et de celles de nos fournisseurs (européens et non-européens) nous pouvons vous affirmer que nous ne travaillons pas avec ces substances.

Nous sommes convaincus de vous avoir informé sur notre approche en la matière de REACH. Nous continuerons à vous informer sur les évolutions ultérieures concernant la complète conformité REACH.

En exprimant notre confiance que cette déclaration offre une réponse à toutes vos questions, questionnaires et soucis par rapport au REACH dans le cadre de notre coopération, nous nous tenons toutefois à votre entière disposition pour toutes questions complémentaires.

Salutations sincères,

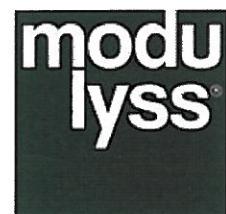

Geert Steeman  
SHE Coordinator

## ISO 26000 Guidance

At the beginning of 2011, modulyss initiated the guidance process for the strategic embedding of CSR in accordance with the ISO 26000 standard, and called on the services of the experts from BECO ([www.beco.be](http://www.beco.be)). This process has resulted in a CSR at modulyss that meets the guidelines of the ISO 26000 standard.

The following steps have been taken in order to work in compliance with the ISO 26000 guidelines:

**1. GAP analysis**

Interviews were conducted in the company to gauge the extent to which modulyss already addresses all relevant CSR issues properly and the extent to which the supply chain is involved in this process. The results of the gap analysis were compiled per ISO 26000 core subject, where the focus lay on points of particular interest on the CRS front in future.

**2. Internal selection of priorities**

This phase built on the **prioritisation** based on the existing application of sustainability (visions, objectives, systems, structures and processes) on the one hand, and points of particular interest in future on the other. Pursuant to the ISO 26000 standard, an action plan is prioritised on the basis of **relevance and significance**.

**3. Identification of stakeholders and charting of a dialogue plan**

According to ISO 26000, it is essential to involve the stakeholders/interested parties of the organisation in the modulyss CSR policy. The most important stakeholders of modulyss were identified. This identification resulted in a stakeholder dialogue plan that indicates clearly the method and frequency of communication with the stakeholders.

**4. Drawing up a CSR action plan**

The identified priorities (step 3) form the basis for the **CSR action** plan of modulyss which monitors and verifies the process continuously: what is the current situation, how will the objective be reached, who is responsible for the implementation in which timeframe.

**5. Monitoring and evaluation**

The CSR policy and action plan are monitored and evaluated by BECO. This monitoring is essential because CSR is a systematic, incremental process, where it is not possible to tackle all challenges at the same time.

Anouk Van de Meulebroecke

Director, BECO Belgium
