JURALCO

JURALCO CLOSETPRO™ MELAMINE WARDROBE SYSTEM

ISSUE 6-22 v1

The HomePlus Melamine Wardrobe Storage Systems are designed and manufactured in New Zealand to meet your individual requirements.
The system combines anodised aluminium components and Melamine cabinetry to make a range of storage configurations for your home for requirements.
Each unit is available as standard or custom made and installed in your home by trained professionals.
Shelving in White, 16mm Particle Board or Coloured 18mm MDF
PVC Edging is standard and a strong metal Soft close mechanism, drawer sides and thick drawer bottoms add up to quality that lasts a lifetime.

General Description
- Easily erected, simple and stylish. Complements modern, contemporary homes
- Available as Wall mounted or Floor Standing units
- Multiple uses including wardrobe organizing, Garage Shelving, Laundry Shelving and Linen Storage
- Simple Camlock Cabinet assembly.
- Finish for all units, White or Coloured
- Standard board thickness 16mm White and 18mm Coloured, all with matching 1mm PVC Edging

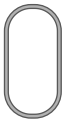
Juralco ClosetPro Melamine Wardrobe System - Installation Tips

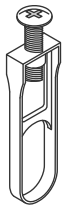
1 - Closet Rail Maximum Recommended Spans

Standard Aluminium
Closet Rail H/8384/3
Maximum unsupported spans...
- Long Hanger (Coats etc) 900mm
- Double Hanger (Shirts etc) 1100mm

Heavy Duty
Aluminium Closet Rail
H/8384HD/3
Maximum unsupported spans...
- Any hanger 1800mm



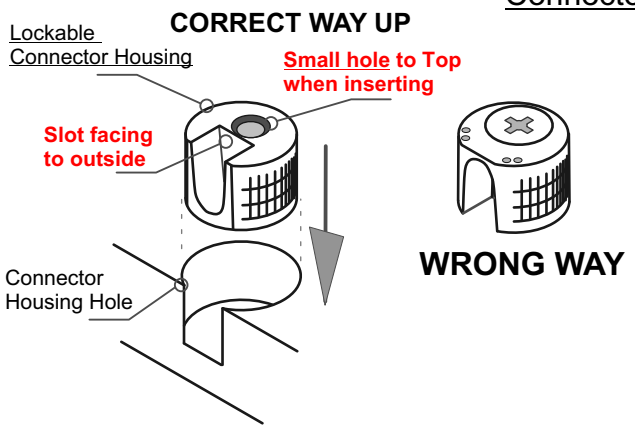
Steel Closet Rail
H/8384ST/3/CP
Chrome Finish
Maximum unsupported spans...
- Any hanger 1800mm



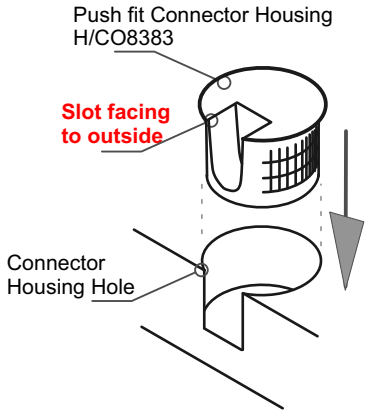
Use the Closet Rail
Centre Support
H/CO 8384CS/CP
for longer spans

2 - Connector Insertion

Connector Housings



Lockable Connector Housing must be used on bottom shelves or in critical strenghtening areas. Tap fit in place. After attaching shelf to the Connector Bolts the locking screws must be tightened (from below)



Push Fit Connector Housing can be used in non critical areas, such as middle shelves

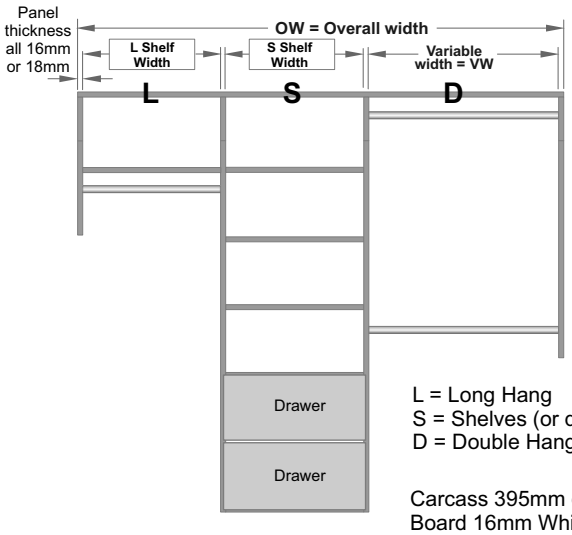
Connector Hole Drilling

If needed extra Connector holes can be drilled with a Bosch Wood Forstner Drill Bit, 20mm Obtainable from General Hardware stores.
1 - Mark out hole centres carefully.
2 - Set correct depth.

Juralco ClosetPro™ Melamine Wardrobe System - Instructions
Wall Mounted Wardrobes

ClosetPro instructions
1 - Measure wardrobe area
2 - Ascertain what style customer wants: 2, 3 or 4 bay
- Double Hang for shirts, pants etc
- Long Hang for long dresses, coats etc
3 - Shelves: Shelf quantities; end panels predrilled for up to 6 shelves
4 - Shelf width; standard sizes 300mm, 400mm, 500mm or 600mm
5 - Drawers: Quantity up to 3. Panels are pre drilled for three drawers at bottom only.

Example...
Juralco Wall Mount 3 x Bay Wardrobe Storage System
Shelves central, Long Hanger and Double Hanger combination



L = Long Hang
S = Shelves (or drawers)
D = Double Hang

Carcass 395mm deep
Board 16mm White or 18mm Coloured

Specify as White (16mm) or Coloured (18mm) Melamine

DETAILS FOR EXAMPLE ABOVE
L Shelf Width = 300, 400, 500 or 600mm
S Shelf Width = 300, 400, 500 or 600mm
VW = OW - (Total addition of all L + S) - (No of bays +1) x 16 (or18)

Say L = 300, S = 500, OW = 1670
Then VW = 1670 - (300+500) - (3+1) x16 (or 18)
=1670-800-64 = 806mm

Note 1 - When cutting H/8386 (Closet Pro Hanging track) or H/8384 (Closet Pro Closet Rail). Use internal width of bay **- 4mm** to ease insertion into socket.
Note 2 - The shelf under the lowermost Drawer stays in position

2

EXAMPLE
Order for this example

A - Circle **one only** box to select

Panel End Style	
(Mitre)	Square

B - Insert numbers required

Panel - Hand, Length Sizes	
Hand, Length	Qty
LH 1800mm	1
RH 1800mm	1
LH 1200mm	0
RH 1200mm	1
LH 600mm	1
RH 600mm	0

Shown are the exact numbers needed for this job. Actual order will be for pack size

C - Insert numbers required

Top Panel Length Sizes	
Length	Qty
2400mm x 295mm	1
2400mm x 395mm	0

Shown are the exact numbers needed for this job. Actual order will be for pack size

A - Insert numbers required

Shelf Width Size	
Shelf Width	Qty
600mm	0
500mm	5
400mm	0
300mm	1

Shown are the exact numbers needed for this job. Actual order will be for pack size

A - Insert numbers required

Drawer Width Size. Soft close	
Drawer Width	Qty (packs)
600mm	0
500mm	2
400mm	0
300mm	0

Shown are the exact numbers needed for this job. Pack size for Drawers is one only

1 - Attach front fixing bracket to drawer front and screw into place.
Please note there are no longer left and rights.

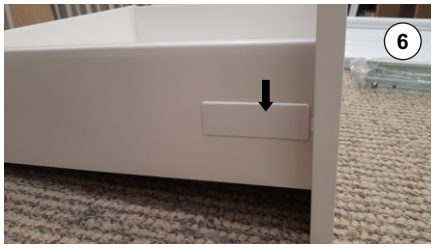
IMPORTANT NOTE.
Wall Hung Drawer Fronts overhang the Wardrobe verticals
Freestanding Drawer Fronts are Inside the Wardrobe verticals
ie they are 36mm smaller in width

2a and 2b - Attach Rear fixing bracket to drawer sides.
This just slides and then clips into place.
There is a left and right of these so make sure you get the correct one.

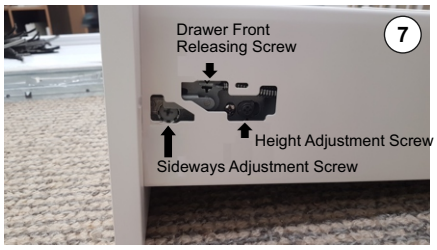
3a and 3b - Screw completed drawer sides to draw base.

4a and 4b - Turn over and screw drawer back into the rear fixing brackets.

5 - Clip the drawer front into place

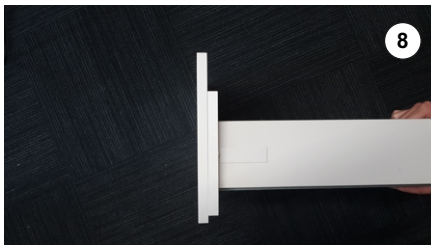


6 - Install the cover plate to hide fixings



7 - Drawer fronts can be adjusted sideways and vertically using the marked screws in photo. Adjustment range as below. The drawer front can be removed if required.

Height Adjustment Screw	+- 1mm
Sideways Adjustment Screw	+- 1mm

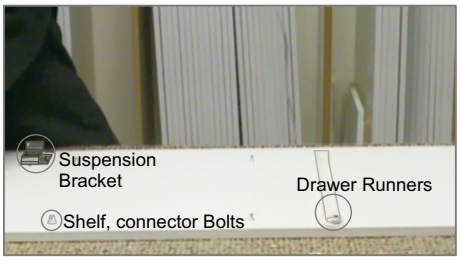


8 - Shows the height difference between the drawer front of the wall hung 4 draw/3 shelf unit and the single individual drawer

9 - Shows the height difference between the new and old metal drawer sides.

Finished

Finished



1

Vertical Panel, Fittings. Attach all fittings to vertical panels, to your plan
See Panel predrilled layouts pages 5-6.

After doing one side, turn over and do other (if necessary).

Suspension Bracket - 2 x 10g x 12 self tappers.
Shelf Bolts - Special connector bolts.
Drawer runners - Euro screw.

Attach Closet Rail Sockets if needed (tap in, no screws required)

After doing one side, turn over and do other (if necessary)
Or cover up all seen holes with stick on dots.

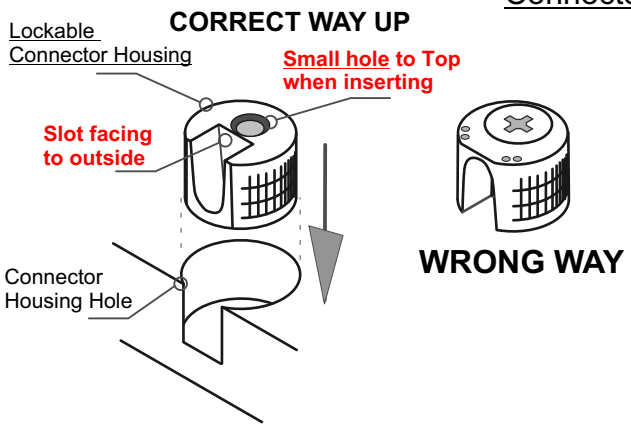
Vertical panels now finished.

2

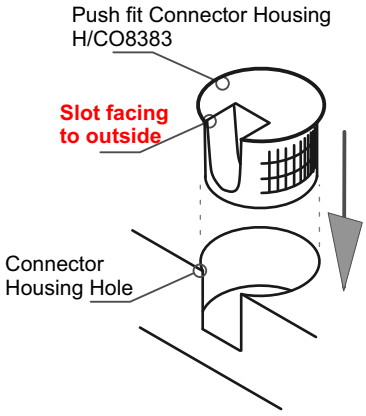
Shelves. Tap Connector Housings in place, 4 per shelf.
When inserting...
1 - Open slot to top **(ie not upside down)**
2 - Slot facing outwards.

Shelf now finished.

Connector Housings



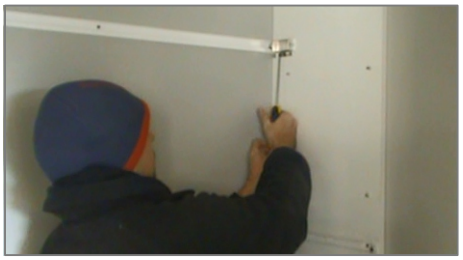
Lockable Connector Housing must be used on bottom shelves or in critical strenghtening areas. Tap fit in place. After attaching shelf to the Connector Bolts the locking screws must be tightened (from below)



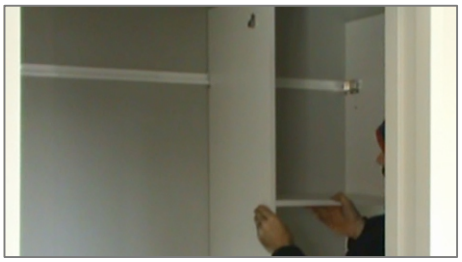
Push Fit Connector Housing can be used in non critical areas, such as middle shelves

3

Installation. Use level to attach full length Closet Hanging Track.
Ensure Track, screw attached firmly into studs.

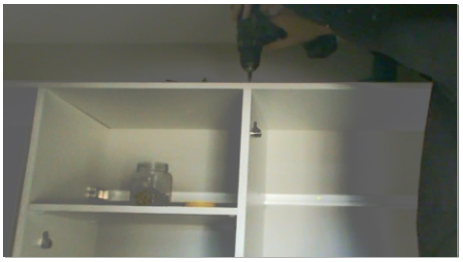


Attach first Vertical panel.
Tighten vertical then horizontal screws on Suspension bracket.



Working from one end...
Clip on second vertical panel.
Then insert Shelves or Rail between these two panels.
Square up second panel, then secure suspension bracket in place.
Then lock shelves (if any) between the first two panels.

Repeat, working along until last panel installed and secured.



Cut Top panel to length.
Edge band ends if edge is visible to the customer.

Place Top panel in correct position,(on top of all vertical panels)
Starting at one end, use Countersink+drill to drill down into Vertical panels.
Screw attach at every panel, screw head flush.

Finally install all shelves, Closet Rails and Drawers.
Final clean up, clean all surfaces.

Job finished.
