

KNIGHTGUARD
Rollergrilles
& Rollershutters

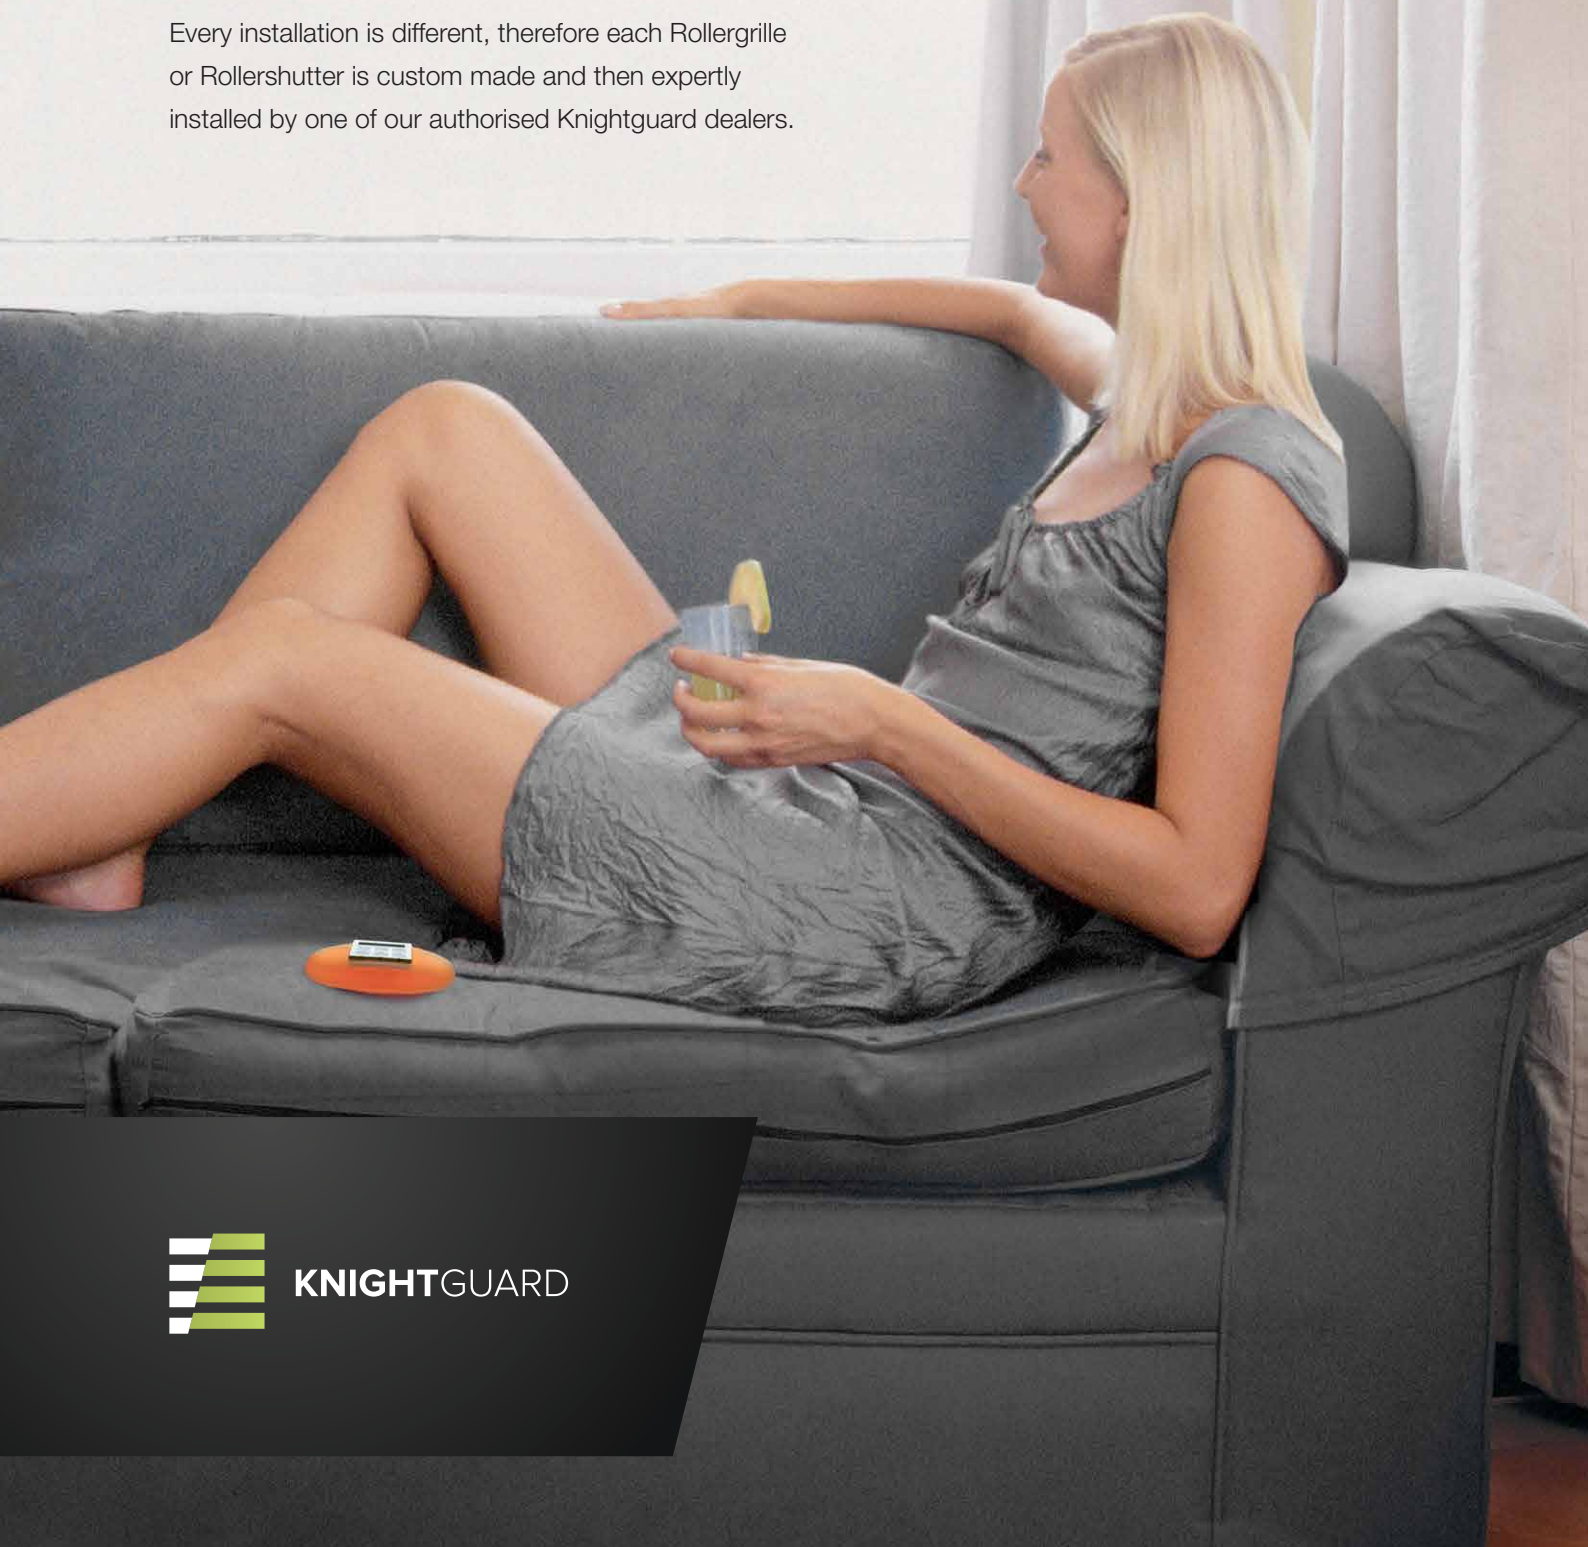

KNIGHTGUARD

For over 25 years Knightguard Rollergrilles and Rollershutters have been the preferred choice of thousands of commercial and residential end users throughout New Zealand & the Pacific.

Quality and dependability are combined with innovative design, to produce a wide range of versatile roller security solutions.

Every installation is different, therefore each Rollergrille or Rollershutter is custom made and then expertly installed by one of our authorised Knightguard dealers.

KNIGHTGUARD

APPLICATIONS

- Shop Fronts
- Arcades
- Bar Tops
- Cafeterias
- Shop Windows

OPERATION

- Motorised

FINISH

- Satin Silver Anodised Aluminium
or Dulux Powder Coat Colours

ECONOMIC ROLLERGRILLES

Econolink Rollergrilles provide high quality security with visibility and airflow, all at an economic price.

MAX HEIGHT
3250mm

MAX WIDTH
5000mm

HEIGHT	1000	1500	2000	2500	3000	3250
ROLL DIAMETERS	240	290	320	335	350	360

CONSTRUCTION: Heavy Duty 12mm OD 6065-T5 aluminium tubes with nylon links (reinforced with fibreglass), for superior strength.

ASSEMBLY: Tubes - 45 mm apart, centre to centre.
Links - 3 tubes per link.
Assembled in brick pattern at 200mm intervals.

GUIDES: 76mm x 32mm full height side guide, with double mohair channels.

AXLE: 70mm galvanised steel octagonal central axle, with 130mm nylon adapter wheels.

*Doorways over 5000mm wide can be accommodated with adjoining doors, where the side guides are joined back-to-back, creating a removable mullion.

APPLICATIONS

- Shop Fronts
- Arcades
- Bar Tops
- Cafeterias
- Shop Windows

curtain partly open. All
close off when fully down.)

COMPACT ROLLERSHUTTERS

Intercept Rollershutters have strong interlocking slats that form a secure rolling curtain/shutter.

MAX HEIGHT
3250mm

MAX WIDTH
4000mm

HEIGHT	1000	1500	2000	2500	3000	3250
HEADBOX - 25mm wall	150	165	180	205	250	250
HEADBOX - 40mm wall	165	180	205	250	250	250

CONSTRUCTION: Interlocking heavy duty aluminium profiles in a choice of three designs.

HEADBOX: Matching folded galvanised headbox in 6 sizes.
Removable front cover for easy access and powder coated to match Rollershutter finish.

GUIDES: 58mm x 22mm full height side guide for shutters up to 2 metres wide.
72mm x 22mm full height side guide for shutters over 2 metres wide.

AXLE: 60mm or 70mm galvanised steel octagonal central axle, depending on weight of curtain.
80mm adapters available for 60mm Axle.
130mm adapters available for 70mm Axle.
Larger configurations only available in motorised operation.

25mm Single Wall Slat

40mm Twin Wall Slat

GUIDES

Knightguard Rollergrilles have 76mm deep side guides, to resist forced entry.

Side guides have a flared curtain entrance with double mohair channels, to ensure a smooth quiet operation. Side guides can either be face or reveal fitted. Removable or angle mullions are available for wide or corner openings.

Intercept Rollershutters have 58mm side guides for shutters up to 2m wide and 72mm for those over 2m.

BOTTOM/MID RAIL

Knightguard Rollergrilles have a specially designed 85mm x 17mm bottom/mid rail in extruded Aluminium 6060 alloy, with a T6 temper for greater rigidity and a detachable back plate. A keyed locking system fits within the rail, which can be incorporated at the bottom or middle of the Rollergrille.

Intercept Rollershutters have a 50mm bottom rail as standard. The rails are finished off with a back plate and footplate, both in extruded aluminium 6060-T5. The footplate includes a mohair buffer strip to prevent damage to expensive entrance floor surfaces.

INSTALLATION BRACKET

Knightguard Rollergrilles use 5mm galvanised steel brackets, with several points of adjustment for ease of installation. A steel spring support bracket, with locking Tek screw is incorporated on one end and a 42mm bearing holder bracket on the other.

Intercept Rollershutters uses a Tek screw fitted to the left hand headbox end cap. A 42mm bearing and bearing holder is fitted to the right hand headbox end cap.

AXLE

Knightguard Rollergrilles use a 70mm galvanised steel octagonal central axle, with 130mm nylon adapter wheels at 500mm centres.

Intercept Rollershutters use a 60mm or 70mm galvanised steel or aluminium octagonal central axle, depending on Rollershutter weight and adapters.

OPERATION

Due to the weight and size, automation is the standard operation for Rollergrille or Rollershutters using a tubular motor. In specific circumstances and for doors of a smaller size, a helically wound torsion spring can be used inside the central axle.

FINISH

Knightguard Ultra Security, Econolink & Visionline - Satin Silver Anodised.

Knightguard Shuttergrille & Visionline, Intercept Rollershutters - 40+ Dulux Powder Coat Colours.

QUALITY CONTROL

All finished Knightguard Rollergrille and Intercept Rollershutters are quality checked and tested on Juralco's vertical test rig before dispatch.

To guarantee customer satisfaction and meet a high standard of quality, Knightguard Rollergrilles & Rollershutters are only available from the most highly qualified tradesmen. Authorised Knightguard dealers are licensed to supply genuine Knightguard Products.
